

Mark Scheme (Results)

Summer 2024

Pearson Edexcel International GCSE
In Geography (4GE1)
Paper 2R: Human Geography

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Marking guidance for levels-based mark schemes

How to award marks

The indicative content provides examples of how students will meet each skill assessed in the question. The levels descriptors and indicative content reflect the relative weighting of each skill within each mark band.

Finding the right level

The first stage is to decide which level the answer should be placed in. To do this, use a **'best-fit' approach, deciding which level most closely describes the quality of the answer.** Answers can display characteristics from more than one level, and where this happens, markers must use the guidance below and their professional judgement to decide which level is most appropriate.

Placing a mark within a level

After a level has been decided on, the next stage is to decide on the mark within the level. The instructions below tell you how to reward responses within a level. However, where a level has specific guidance about how to place an answer within a level, always follow that guidance. Statements relating to the treatment of students who do not fully meet the requirements of the question are also shown in the indicative content section of each levels-based mark scheme. These statements should be considered alongside the levels descriptors.

Markers should be prepared to use the full range of marks available in a level and not restrict marks to the middle. Markers should start at the middle of the level (or the upper-middle mark if there is an even number of marks) and then move the mark up or down to find the best mark. To do this, they should take into account how far the answer meets the requirements of the level:

- if it meets the requirements fully, markers should be prepared to award full marks within the level. The top mark in the level is used for answers that are as good as can realistically be expected within that level
- if it only barely meets the requirements of the level, markers should consider awarding marks at the bottom of the level. The bottom mark in the level is used for answers that are the weakest that can be expected within that level
- the middle marks of the level are used for answers that have a reasonable match to the descriptor. This might represent a balance between some characteristics of the level that are fully met and others that are only barely met.

Question number	Answer	Mark
1(a)(i)	<p style="text-align: center;">AO1 (1 mark)</p> <p>D lack of education. (1)</p> <p>The answer cannot be A, B or C as these are not causes of informal employment.</p>	(1)

Question number	Answer	Mark
1(a)(ii)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable advantage:</p> <ul style="list-style-type: none"> • No taxes to pay (1) • Potential for flexibility in working hours (1) • Potential for income to support family (1) • Access to jobs with lack of formal education (1) • Less qualifications needed for jobs (1) • Access to cheaper goods and services (1) <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
1(b)	<p style="text-align: center;">AO1 (1 mark)</p> <p>D quaternary (1)</p> <p>It cannot be A, B or C as these are not the correct sector for a research scientist to be located.</p>	(1)

Question number	Answer	Mark
1(c)	<p style="text-align: center;">AO2 (1 mark) / AO3 (1 mark)</p> <p>Award 1 mark for basic evidence from the from the figure (AO3) and a further 1 mark for extension through explanation (AO2), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • Cars are being produced (1) and secondary sector involves the production of manufactured goods (1). <p>Car manufacturing (1) involves the conversion of raw materials to manufactured goods (1).</p> <p>Secondary sector involves manufacturing (1) and the figure shows cars being produced (1).</p> <ul style="list-style-type: none"> • Machinery involved in production (1) showing manufacturing which is a core activity of the secondary sector (1). • Few workers present (1) as a lot of work in secondary sector is completed by machines (1). <p>Accept any other appropriate response.</p>	(2)

Question number	Answer	Mark
1(d)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable reason.</p> <ul style="list-style-type: none"> • Deindustrialisation (1) • Mechanisation/increase technology (1) • Population growth (1) • Change in demand for services (1). • Increased education (1). • Increase in disposable income (1) • Country development (1) • Urbanisation (1) • Investment by government/government policy (1) <p>Accept any other reasonable response.</p>	(1)

Question number	Answer	Mark
1(e)	<p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for a suitable positive and negative impact and a further expansion mark, up to a maximum of 2 marks each. Maximum 2 marks for the positive or negative impact.</p> <p>Range of developed countries may be used. Shift to tertiary or quaternary sector will usually be used as context.</p> <p>Positive:</p> <ul style="list-style-type: none"> • Greater employment from tertiary jobs/services (1) which leads to higher income (1) • Greater employment in quaternary sector (1) due to increased innovation/increased availability of technology (1) <p>Negative:</p> <ul style="list-style-type: none"> • Decrease in primary/secondary (1) means imported goods so loss of jobs (1) • Deindustrialisation (1) unemployment/negative economic multiplier/spiral of decline (1) <p>Accept any other appropriate response.</p>	(4)

Question number	Answer	Mark
1(f)	<p style="text-align: center;">AO1 (1 mark) / (AO3) 2 marks</p> <p>Award 1 mark (AO1) for reference to the level of investment shown in figure, and a further 2 marks (AO3) for extension with possible reference to the resource, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • Greater investment in renewable energy to increase energy security (1) and reduce reliance on fossil fuels (1) to reduce carbon emissions (1). • Increase in investment in electric vehicles to reduce use of petrol engine vehicles (1) to reduce carbon emissions (1) to mitigate against climate change (1). • Consistent levels of investment in low carbon fuels because they are expensive (1) and it is more cost efficient to invest in renewable power (1) which means more energy can be produced (1). • Increased investment in renewable energy resources (1) from around US\$300 to 450 billion (1) due to countries trying to meet requirements of international agreements on carbon emissions (e.g. Paris Agreement)(1). • Increased investment overall (1) due to increased development of countries (1) which requires more energy resources (1). <p>Accept any other appropriate response.</p>	(3)

Question number	Answer	Mark
1 (g)	<p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for an advantage and for a disadvantage of using solar panels and a further expansion mark, up to a maximum of 2 marks each.</p> <p>Advantage:</p> <ul style="list-style-type: none"> • Relies on the power of the sun (1) which means areas of the world are suitable for power generation through solar panels (1). • Can be used to supply electricity off grid (1) which means more remote rural locations can be provided with electricity (1). • Renewable energy (1) will not run out like fossil fuels/ does not contribute to climate change/does not increase carbon emissions (1). <p>Disadvantage</p> <ul style="list-style-type: none"> • High installation costs (1) which may be prohibitive for places/people with lower incomes (1). • Only generate power during hours of sunlight (1) which means a battery needed to store energy (1). • In some countries are not as sunny (1)/which means they don't operate fully at all times (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Indicative content
1 (h)	<p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • The world continues to rely on fossil fuels for the production of energy. • Increased population growth is associated with increased demand for energy which in most countries cannot be met by renewable energy alone. • Industrialisation in developing and emerging economies has led to increased demand for energy. • Despite international pressures to reduce the use of fossil fuels, many countries still rely on fossil fuels for a large proportion of their

	<p>energy, in part due to availability of resources, but also to ensure energy security.</p> <ul style="list-style-type: none"> The rate of fossil fuel use growth may be beginning to slow as the realisation of climate change and international agreements require governments to reduce carbon emissions and begin to reduce reliance on fossil fuels. <p>AO4</p> <ul style="list-style-type: none"> Figure 1c shows increased production of energy from fossil fuels from 1981-2021. Figure 1c shows that coal has increased from around 20,000TWh to over 40,000 Twh. Figure 1c shows how the relative proportion of gas production has increased since 1981. Figure 1c shows there have been periods short reductions in the use of fossil fuels in 2010 and 2020. 	
Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	<ul style="list-style-type: none"> Attempts to apply understanding to deconstruct information but understanding and connections are flawed. An unbalanced or incomplete argument that provides limited synthesis of understanding. Judgements that are supported by limited evidence. (AO3) Uses some geographical skills to obtain information with limited relevance and accuracy, which supports few aspects of the argument. (AO4)
Level 2	4–6	<ul style="list-style-type: none"> Applies understanding to deconstruct information and provide some logical connections between concepts. An imbalanced argument that synthesises mostly relevant understanding, but not entirely coherently, leading to judgements that are supported by evidence occasionally. (AO3) Uses geographical skills to obtain accurate information that supports some aspects of the argument. (AO4)
Level 3	7–8	<ul style="list-style-type: none"> Applies understanding to deconstruct information and provide logical connections between concepts throughout. A balanced, well-developed argument that synthesises relevant understanding coherently leading to judgements that are supported by evidence throughout. (AO3) Uses geographical skills to obtain accurate information that supports all aspects of the argument. (AO4)

Question number	Answer	Mark
2(a)(i)	<p style="text-align: center;">AO1 (1 mark)</p> <p>C interaction of living organisms with their environment (1)</p> <p>The answer cannot be A, B or D as these are not definitions of a natural ecosystem.</p>	(1)

Question number	Answer	Mark
2(a)(ii)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for suitable service.</p> <ul style="list-style-type: none"> • Tourism/named tourist activity/recreation/employment (1) • Nutrient/water cycling (1) • Health/wellbeing (1) • Climate regulation (1) • Carbon sink/storage/removing CO₂ from the atmosphere/oxygen production (1) • Storm protection (1) • Habitat for species (1) • Energy production (1) <p>Accept any other appropriate responses.</p>	(1)

Question number	Answer	Mark
2(b)	<p style="text-align: center;">AO2/AO3 (2 marks)</p> <p>Award 1 mark for identification of characteristics of a specific biome, and a further mark for description or development.</p> <p>The response must relate to one of the biomes shown in Figure 2a.</p> <p>The characteristics may refer to the climate or the flora/fauna that can be found there.</p> <ul style="list-style-type: none"> • Tropical rainforest: high density forests (1) with high annual rainfall (1) • Desert: high temperatures (1) which only supports plants like cacti (1). • Tundra: cold environments (1) due to high altitude (1) • Temperate forests: regular rainfall (1) that support the growth of trees (1). • <p>Accept any other appropriate response.</p>	(2)

Question number	Answer	Mark
2(c)	<p style="text-align: center;">AO1 (1 mark)</p> <p>D farming that is dependent on animals (1).</p> <p>The answer cannot be A, B or C as these are not definitions of pastoral farming.</p>	(1)

Question number	Answer	Mark
2(d)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable way provided.</p> <ul style="list-style-type: none"> • Water pollution/contamination/eutrophication (1) • Deforestation (1) • Soil erosion (1) • Provides employment (1) • Lack of soil fertility/damage soil (1) • Overgrazing/overcultivation (1) • Desertification (1) • Increased productivity/output (1) <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
2(e)	<p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for identification of an impact, and a further expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> • Can lead to building on greenfield land (1) which can lead to increased traffic/air/water/noise/light pollution (1). • Can lead to population growth in rural areas (1) as people seek to move away from cities (1). • Loss of biodiversity (1) as new buildings/roads in rural areas can damage habitats (1). • Deforestation (1) to clear land to build new houses (1). • Increase in housing prices (1) due to increased demand in the area (1). • Improved accessibility (1) due to investment in infrastructure/improvement in public transport (1). • Keeping local businesses to be viable (1) due to increase in local spending (1). • Can lead to the development of more services being built (1) as population increases so does demand for services (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Answer	Mark
2(f)	<p style="text-align: center;">AO1 (1 mark) / (AO3) 2 marks</p> <p>Award 1 mark for an identification of way investment in rural environments can improve quality of life, a further 2 marks for extension through explanation with reference to the resource, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • Increased investment in rural transportation can ensure people can still access goods and services (1) which can prevent rural decline (1) and support livelihoods (1). • Investment in schools ensures that rural populations can maintain their education (1) which means they are more likely to be in employment later in life (1) which reduces chance of poverty (1). • Investment in cultural activities may lead to increased tourism (1) which could create more jobs for local people (1) which could improve household incomes (1). • Investment of 5.6% in clean water could increase availability of water (1) which could be used for irrigation (1) to increase agricultural output (1). <p>Accept any other appropriate response.</p>	(3)

Question number	Answer	Mark
2(g)	<p style="text-align: center;">AO2 (4 marks)</p> <p>Award 1 mark for initial explanation of how rural-urban migration has affected rural areas, and an additional 1 mark for development through further explanation or exemplification, up to a maximum of 2 marks for each.</p> <p>A range of countries could be chosen.</p> <ul style="list-style-type: none"> • High levels of rural-urban migration to the growing cities have left many surrounding rural areas with less working age adults (1) which means agricultural production is reduced (1). • With increased populations in the cities less investment for some services takes place in rural areas (1) which means some remote rural areas may find it difficult to access healthcare services (1). • Negative multiplier effect (1) due to loss of younger workers (1). • Less pressure on services/food supplies (1) due to smaller population (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Indicative content	
2 (h)	<p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • Farm diversification provides the opportunity to develop other income streams. • Some farms adopt several diversification strategies because one on its own is not always sustainable. • There are a range of farm diversification strategies which could be used alongside holiday rentals or solar energy, including GM crops, agritourism, using land for renewable energy. • Many farms move to diversification in order to counter reduction in profit from more traditional income streams such as crop and livestock production. <p>AO4</p> <ul style="list-style-type: none"> • Figure 2c shows there has been an increase in the percentage of farms with diversified activities. • Figure 2c shows how there has been some fluctuation in overall diversified activity. • Figure 2c shows how farm producing solar energy have grown from around 1% to around 22% by 2021/2022. • Figure 2c show how there has been over half of farms that have diversified activities and there have been no significant decreases.

Question number	Answer	Mark
3(a)(i)	<p style="text-align: center;">AO1 (1 mark)</p> <p>C - Lahore, Pakistan 11.1 million people (1)</p> <p>The answer cannot be A, B or D as the populations are below 10 million which is the minimum for a megacity.</p>	(1)

Question number	Answer	Mark
3(a)(ii)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for any suitable definition.</p> <ul style="list-style-type: none"> • The movement of people / employment from major cities to smaller cities and towns/ to rural areas. (1) • Movement away from urban areas (1). <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
3(b)	<p style="text-align: center;">AO1 (1 mark)</p> <p>C – existing roads and electricity present (1)</p> <p>The answer cannot be A, B or D as these are not reasons for building on a brownfield site.</p>	(1)

Question number	Answer	Mark
3(c)	<p style="text-align: center;">AO2 (1 mark) / AO3 (1 mark)</p> <p>Award 1 mark for basic evidence from the resource (AO3) and a further 1 mark for extension through explanation (AO2), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • Accessibility (1) as there are clear access by road (or by river) (1). • High density buildings (1) suitable for commercial office blocks (1). • Land value (1) which favours commercial / business land uses (1). • Evidence of piers/waterside/port (1) which allows access by boat/transporting goods by boat (1). • Limited space (1) which has driven the need for high-rise housing (1). • Limited green space (1) due to rapid urbanisation (1). • Green spaces (1) used for leisure (1). <p>Accept any other appropriate response</p>	(2)

Question number	Answer	Mark
3(d)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable source of air pollution.</p> <ul style="list-style-type: none"> • Cars / vehicles/ lorries/ traffic /trains (1) • Factories (1) • Construction (1) • Wood burners (1) • Burning fossil fuels/power plants (1) <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
3(e)	<p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for an initial idea of how urbanisation can lead to housing challenges, with a further mark for expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> • High levels of rural to urban migration can lead to rapidly growing populations (1) which can outstrip supply leading to the growth of informal settlements (1). • Urbanisation can lead to increase in the value of land/housing (1) which can mean some people can no longer afford to live in the urban area (1). • High demand for housing (1) can lead to very cramped living conditions/creates high density housing (1). • Increased number of people when services (e.g. waste disposal) are inadequate (1) can lead to unsanitary conditions/disease/shortage of available clean water (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Answer	Mark
3(f)	<p style="text-align: center;">AO1 (1 mark) / (AO3) 2 marks</p> <p>Award 1 mark for an identification of the pattern shown and a further 2 marks for extension through explanation or description, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • There are high levels of informal employment in the African countries shown (1) which may have been caused by rapid rural-urban migration (1) which may have been faster than the growth in jobs (1). • Between 63-86% of employment in the African cities shown was informal (1) this may be due to lack of education of some of the people who moved to the city (1) which meant they could not access formal employment (1). <p>Accept any other appropriate response.</p>	(3)

Question number	Answer	Mark
3(g)	<p style="text-align: center;">AO2 (4 marks)</p> <p>Award 1 mark for initial idea and an additional 1 mark for development through further explanation or exemplification.</p> <p>A range of countries and examples could be chosen.</p> <ul style="list-style-type: none"> ○ Improve public transport (1) to reduce congestion and improve accessibility (1). ○ Congestion charges (in cities like London) (1) to improve air quality/plants remove more CO₂ (1). ○ Increasing green spaces/recreational areas (such as the High line in New York) (1) to improve mental wellbeing (1). ○ Introducing affordable home schemes (1) so people can afford to live in cities and not commute such long distances (1). ○ Increase taxes (1) to pay for healthcare/waste collection (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Indicative content
3(h)	<p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive, and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • More than half the world's population lives in urban areas. By 2050 it is predicted that more than two thirds of the world's population will live in urban areas. • For some areas of the world that have already gone through industrialisation and shifts to tertiary and quaternary sectors, rapid urbanisation took place decades ago. Many European countries have seen the rate of urbanisation slow down, and experience counter-urbanisation. • Many developing or emerging economies that are undergoing industrialisation are experiencing more rapid urbanisation, in part due to the development of their economy and the associated rural-urban migration. • Rapid urbanisation driven by rural-urban migration as people move in search of jobs, the possibility of higher incomes, and greater access to services.

	<ul style="list-style-type: none"> Investment often concentrates in urban areas leading to greater development of industries and business which further fuels rural-urban migration as well as urban sprawl. <p>AO4</p> <ul style="list-style-type: none"> Figure 3c shows how urban growth rates have differed between Africa and Europe. Figure 3c shows how Europe has had higher proportions of urban populations since 1950, with predictions this will continue until 2050. Figure 3c shows how Europe rises from around 50% urban in 1950 to around 80% by 2050, whereas it is about 13% to 55% for Africa in this time period. Figure 3 shows how Africa passes 50% of population being urban in around 2035, whereas this was already at 50% for Europe before 1950. Figure 3c shows that by 2050 it is expected that both regions will have over 50% of populations living in urban areas.

Question number	Indicative content
9 (f)	<p style="text-align: center;">AO2 (4 marks), AO3 (4 marks), AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO2</p> <ul style="list-style-type: none"> • There are a range of economic, demographic, social, cultural, political and environmental indicators which can be used to measure development. • Progress in development can be understood using a range of different indicators which may relate to economic (GDP) or social (literacy rate) aspects of society or a mixture (e.g. HDI). • Economic indicators of development often include: GDP, GDP per capita, GNP, and employment levels. • Gross Domestic Product (GDP) is a measure of economic activity in a country. It is calculated by adding the total value of a country's output of goods and services in one year. • Different factors contribute to the development of a country / region: cultural, technological, social, economic as well as wider measures such as stability and water availability. • Human Development Index which uses several indicators (years of schooling/life expectancy and GDP per capita) to understand overall levels of development. <p>AO3</p> <ul style="list-style-type: none"> • Many economic measures such as GDP do not take into account the living standards which are an important social aspect of development. • Some composite measures such as HDI recognise that the criteria for measuring development should be more than just economic growth alone. Trends in HDI show progress in development across the world (with minor reductions in 2019-20), although this doesn't necessarily match the trend shown by GDP. • Most economic indicators do not even capture all economic activity. For example GNP per capita does not take in to account the value of subsistence production. • Many indicators which are used to understand global development use measurements for the national scale. This masks uneven development within countries. There may be regions of some countries which have seen great progress, but these are not usually presented through national economic indicators. <p>AO4</p> <ul style="list-style-type: none"> • Figure 9b shows how have been increases in GDP for many countries around the world since 1990.

Question number	Indicative content	
	<ul style="list-style-type: none"> • Figure 9b shows how the level of GDP growth varies significantly around the world. • Figure 9b shows how higher rates of growth are not only experienced by developed countries, but developing and emerging countries too. • Figure 9c shows there 6 potential factors that can affect human welfare. • Figure 9c shows how human welfare can be affected by social, economic and environmental factors. • Figure 9c shows how there could be many routes to improving human welfare.
