<h1 style="margin: 0;">Mathematics B</h1> <h2 style="margin: 0;">Paper 2</h2> 	
Friday 10 June 2011 – Morning Time: 2 hours 30 minutes	Paper Reference 4MB0/02
You must have: Ruler graduated in centimetres and millimetres, protractor, compasses, pen, HB pencil, eraser, calculator. Tracing paper may be used.	Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- **Calculators may be used.**

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.
- Without sufficient working, correct answers may be awarded no marks.

Trapezium B is the image of trapezium A following a reflection in the line $x = -1$

(a) Draw and label trapezium B .

(2)

Trapezium C is the image of trapezium B following a translation with vector $\begin{pmatrix} 0 \\ -8 \end{pmatrix}$.

(b) Draw and label trapezium C .

(2)

Trapezium D is the image of trapezium C following a rotation of 90° anticlockwise about the point $(-5, -3)$.

(c) Draw and label trapezium D .

(2)

Trapezium A is the image of trapezium D under a single transformation.

(d) Describe fully this transformation.

(2)

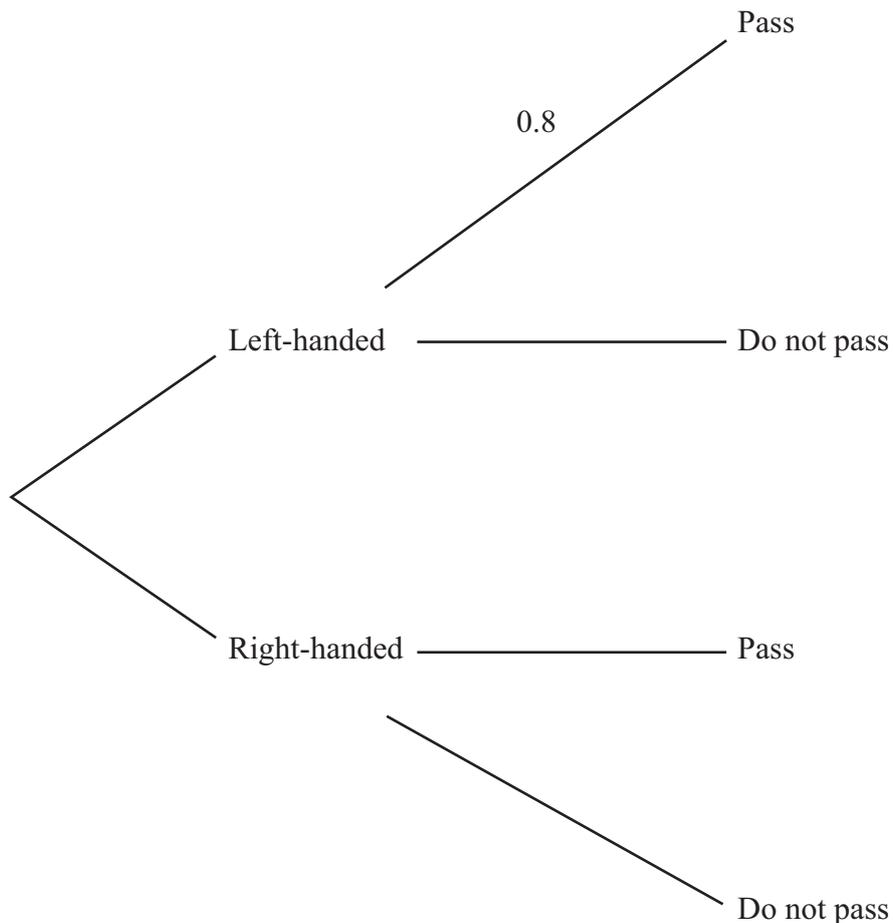

- 8 Left-handed and right-handed people do a test. It is found that 80% of left-handed people pass the test and 90% of right-handed people pass the test.

On the island of Sinestra, three quarters of the population are left-handed and the remainder are right-handed.

A person on Sinestra is to be chosen at random to take the test.

- (a) Write down the probability that the person chosen is right-handed. (1)

- (b) Complete the tree diagram to show all the information. (3)

- (c) From your completed tree diagram, or otherwise, find the probability that the person chosen,
- is left-handed and will pass the test,
 - will pass the test.
- (5)

A person is selected at random from Sinestra. Given this person passed the test, use your answers to part (c) to

- (d) determine the probability that this person is left-handed. (3)

accurately drawn

Figure 4

In Figure 4, OAB is a triangle with $\vec{OA} = \mathbf{a}$ and $\vec{OB} = \mathbf{b}$.
 D is the midpoint of OA .

(a) Write down, in terms of \mathbf{a} or \mathbf{b} , or \mathbf{a} and \mathbf{b} ,

(i) \vec{OD} ,

(ii) \vec{AB} .

(2)

C is the point on AB such that $AC : CB = 1 : 2$

(b) Find in terms of \mathbf{a} and \mathbf{b} , simplifying your answer, an expression for \vec{OC} .

(2)

E is the point on AB such that $AE : EB = 2 : 1$

(c) Find in terms of \mathbf{a} and \mathbf{b} , simplifying your answer, an expression for \vec{DE} .

(2)

F is the intersection of the lines OC and DE .

Given that $\vec{OF} = \lambda \vec{OC}$,

(d) express \vec{OF} in terms of λ , \mathbf{a} and \mathbf{b} .

(1)

Given that $\vec{DF} = \mu \vec{DE}$,

(e) express \vec{OF} in terms of μ , \mathbf{a} and \mathbf{b} .

(2)

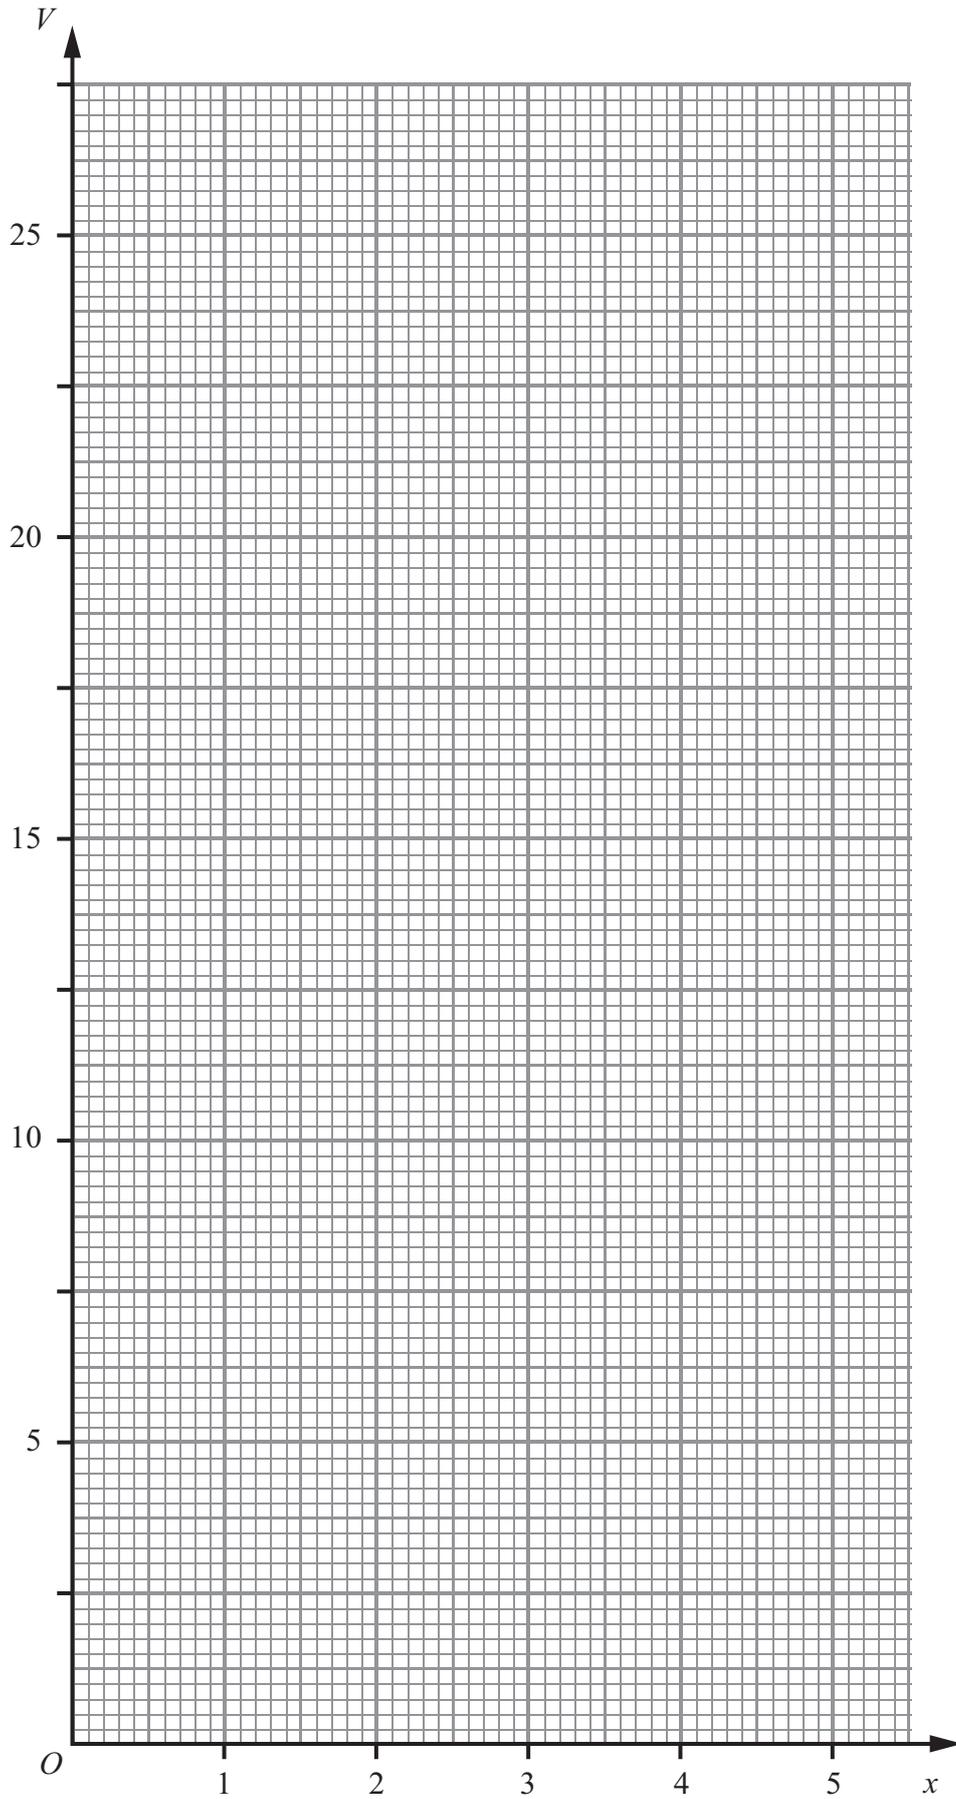

(f) Find the value of μ and the value of λ .

(4)

Question 9 continued

A large rectangular area with rounded corners, containing 25 horizontal dotted lines for writing.

(Total for Question 10 is 16 marks)

11

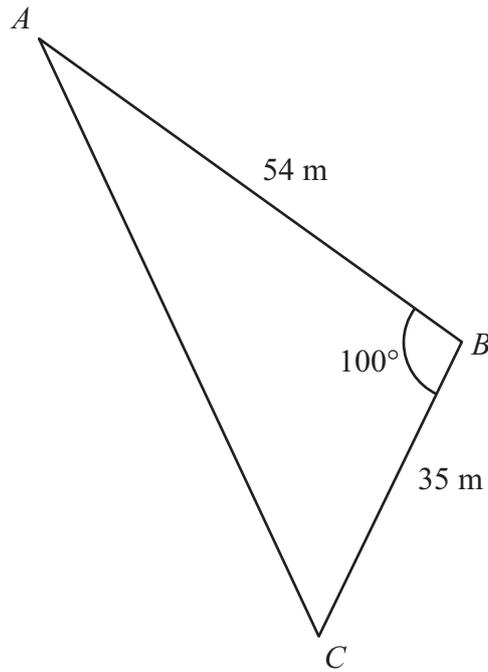

Figure 6

Figure 6 shows a triangular field on horizontal ground. $AB = 54$ m, $BC = 35$ m and $\angle ABC = 100^\circ$.

Calculate, giving your answers to 3 significant figures,

(a) the length, in m, of AC , (3)

(b) the size in degrees, of $\angle CAB$. (3)

D is the point on AC such that BD is perpendicular to AC .

(c) Calculate, giving your answer to 3 significant figures, the length, in m, of BD . (2)

A vertical mast is placed at the midpoint of BD .

(d) Calculate, giving your answer to 3 significant figures, the distance, in m, from C to the base of the mast. (6)

The angle of elevation of the top of the mast from C is 40° .

(e) Calculate, giving your answer to 3 significant figures, the height, in m, of the mast. (2)
