Paper 3 Structured Questions

May/June 2017

MARK SCHEME

Maximum Mark: 150

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2017 series for most Cambridge IGCSE[®], Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

© IGCSE is a registered trademark.

This document consists of **16** printed pages.

Question	Answer	Marks
2(e)	Responses could include: • FIFO and AVCO are accounting methods in costing inventories permitted by the international accounting standard (IAS 2); to adopt which method is the accounting policy of the business • Business should select and apply its accounting policies consistently • Financial statements should contain relevant and reliable information • Business shall change an accounting policy only if the change (1) is required by the accounting standards; or (2) results in the financial statements providing reliable and more relevant information about the effects of transactions. • The cost of goods has an increasing trend. FIFO method attracts a higher inventory value and therefore a higher gross profit. • The directors cannot change the method if its purpose is only to improve the profitability. Accept any reasonable alternative (1 mark) for recommendation (1 mark) × 3 valid reasons	4
