Section A

Answer all parts of Question 1.

1 **China's population trend**

China's economic miracle has been built on a seemingly endless supply of affordable labour from a population of 1.4 billion.

Content removed due to copyright restrictions.

Fig. 1.1 Annual population change in China, 1970 to 2050

GradeMax

(a) Explain what is meant by an optimum population. [2]

(b) Explain how China's population structure changed between 1970 and 2020 **and** consider whether the statement 'its population is decreasing' is supported by Fig. 1.1. [5]

(c) Identify **two** observations economists have made about changes in China's population **and** analyse how these changes would affect GDP. [6]

(d) China's government has a different view from what it says are the alarming statements made by economists. Consider the effects on the economy of the population policies suggested by China's government. [7]

Section B

Answer **one** question.

EITHER

2 Oligopolies are able to avoid price competition while maintaining supernormal profits in the long run.

Evaluate this statement. [20]

OR

3 With the help of a diagram, evaluate the consequences of imposing an effective minimum wage on the employment level and the wage level in a monopsony labour market. [20]

Section C

Answer **one** question.

EITHER

4 With the help of a diagram, assess the effectiveness of government policies that might be used to reduce demand-pull inflation. [20]

OR

5 With the help of a diagram, evaluate the effectiveness of the use of expenditure-switching policies to reduce a current account deficit on the balance of payments. [20]
