Paper 5 Probability & Statistics 1

May/June 2023

1 hour 15 minutes

You must answer on the question paper.

You will need: List of formulae (MF19)

INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [].

This document has **12** pages.

2

- 1** Two fair coins are thrown at the same time repeatedly until a pair of heads is obtained. The number of throws taken is denoted by the random variable X .

(a) State the value of $E(X)$. [1]

.....

.....

.....

.....

.....

(b) Find the probability that exactly 5 throws are required to obtain a pair of heads. [1]

.....

.....

.....

.....

.....

(c) Find the probability that fewer than 7 throws are required to obtain a pair of heads. [2]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

[5]

This image shows a full page of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page, typical of notebook or legal stationery. There are no margins, text, or other markings on the page.

- [illegible]

5

- (b) Draw up the probability distribution table for X , giving the probabilities as numerical fractions. [1]

.....

.....

.....

.....

.....

.....

.....

.....

- (c) Given that $E(X) = 3.2$, find $\text{Var}(X)$. [2]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- 4 The times taken, in minutes, to complete a cycle race by 19 cyclists from each of two clubs, the Cheetahs and the Panthers, are represented in the following back-to-back stem-and-leaf diagram.

Cheetahs						Panthers				
9 8					7	4				
8	7	3	2	0	8	6 8				
9 8 7					9	1 7 8 9 9				
6	5	3	3	1	10	2 3 4 4 5 6				
9 8 2					11	1 2 8				
4					12	0 6				

Key: 7 | 9 | 1 means 97 minutes for Cheetahs and 91 minutes for Panthers

- (a) Find the median and the interquartile range of the times of the Cheetahs. [3]

.....

.....

.....

The median and interquartile range for the Panthers are 103 minutes and 14 minutes respectively.

- (b) Make two comparisons between the times taken by the Cheetahs and the times taken by the Panthers. [2]

.....

.....

.....

.....

Another cyclist, Kenny, from the Cheetahs also took part in the race. The mean time taken by the 20 cyclists from the Cheetahs was 99 minutes.

- (c) Find the time taken by Kenny to complete the race. [3]

.....

.....

.....

.....

.....

- 5** Jasmine throws two ordinary fair 6-sided dice at the same time and notes the numbers on the uppermost faces. The events A and B are defined as follows.

A : The sum of the two numbers is less than 6.

B : The difference between the two numbers is at most 2.

- (a)** Determine whether or not the events A and B are independent. [4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- (b)** Find $P(B \mid A')$. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

6 The mass of grapes sold per day by a large shop can be modelled by a normal distribution with mean 28 kg. On 10% of days less than 16 kg of grapes are sold.

(a) Find the standard deviation of the mass of grapes sold per day. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

The mass of grapes sold on any day is independent of the mass sold on any other day.

(b) 12 days are chosen at random.

Find the probability that less than 16 kg of grapes are sold on more than 2 of these 12 days. [3]

.....

.....

.....

.....

.....

-
- This image shows a full page of a document template designed for handwriting practice. It consists of ten identical horizontal rows. Each row is defined by two parallel dashed lines, one above and one below the writing area, providing a guide for letter height and placement. The background is plain white, and there are no margins or additional markings present.

- 7 (a) Find the number of different arrangements of the 10 letters in the word CASABLANCA in which the two Cs are **not** together. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- (b) Find the number of different arrangements of the 10 letters in the word CASABLANCA which have an A at the beginning, an A at the end and exactly 3 letters between the 2 Cs. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- [illegible]

This image shows a full page of white paper with horizontal dotted lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting practice. There are no margins, text, or other markings on the page.
