MARK SCHEME

Maximum Mark: 80

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2025 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

This document consists of **11** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Annotations guidance for centres

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

Annotations

Annotation	Meaning
	Omission or to indicate where a company brand name has been used
	Incorrect
	Follow through
Highlighter	Information copied from the text
	Ignore subsequent work
	Two statements are linked
	Maximum number of marks that can be awarded
	Not answered question
Off-page comment	Allows comments to be entered at the bottom of the RM marking window and then displayed when the associated question item is navigated to.
On-page comment	Allows comments to be entered in speech bubbles on the candidate response.
	Principal examiner has approved the mark
	Repeat
	Indicates that work/page has been seen including blank answer spaces and blank pages.
	Correct

Mark scheme abbreviations

/ separates alternative words / phrases within a marking point

// separates alternative answers within a marking point

underline actual word given must be used by candidate (grammatical variants accepted)

max indicates the maximum number of marks that can be awarded

() the word / phrase in brackets is not required, but sets the context

Note: No marks are awarded for using brand names of software packages or hardware.

The following must be applied
Examiners must ensure that annotations are placed so they can be easily seen in white space where or close to where the mark is awarded
Before submitting a script please check all ticks match the marks
At the end of prose answers/long answer place an annotation at the end of the answer to show that the whole answer has been read, unless a marking annotation has been placed near or at the end of the answer.
On any blank pages place one SEEN annotation
Read the whole sentence before marking it
If an answer is blank then use SEEN and award NR, but if anything has been written for example 'Don't know', '?' etc then use NAQ and award 0.
If an answer has been attempted and crossed out and no other answer written then attempt to mark it.

Question	Answer	Marks
1	Blu-ray disc reader DVD reader	2

Question	Answer	Marks
2(a)	Two from: Allows the user to add different features to the sound Generates sounds Can export the sounds	2
2(b)	Two from: Compilers Device drivers Linkers Operating systems // BIOS Utilities	2

Question	Answer	Marks
3	Benefits Max five from: Plotters work on larger sheets of paper Produce high quality output Plotters can print on a number of different materials Drawings are very accurate Multi-colour as standard Draw at high speed but maintain consistency Drawbacks Max five from: Take up a lot of physical space Can be noisy Expensive to maintain Not as portable as a printer Can be slower to output than a printer	6

Question	Answer	Marks
4(a)(i)	One from: To ensure they store data correctly To identify any errors It's crucial for creating robust apps	1
4(a)(ii)	One from: To ensure the user enters data correctly	1
4(b)	One from: Data that is within the bounds of acceptability Data that is reasonable / sensible Data that is accepted by the system	1
4(c)	One from: A G	1

Question	Answer	Marks
5(a)	One from: To help the user learn how to use the program To help with troubleshooting	1
5(b)	Three from: Error handling Error messages Frequently asked questions / FAQ Glossary of terms Hardware requirements How to add records How to delete / edit records How to load / run / install the program How to print data How to save a file Limitations of the system Output format Purpose of the system Sample runs Software requirements Troubleshooting guide / helpline	3
5(c)	Four from: Cheaper to produce than a printed booklet Can be more up to date Can be updated more easily Faster to search for information digitally Can use hyperlinks to other related websites Can contain multi-media	4

Question	Answer	Marks
6(a)	Three from: Use a wrist rest Take regular breaks Use an ergonomic keyboard / ergonomic mouse Use voice activated software	3
6(b)	Three from: Use an anti-glare screen Look away from the screen frequently Have eyes tested regularly Use blue light lens glasses Adjust screen brightness to the brightness of the room Keep the screen free from dust and dirt	3

Question	Answer	Marks
7(a)	Three from: It is a service Completely controlled by Tawara cars Restricted access Private clouds tend to be free for users	3
7(b)	Stored Max three from: Data is uploaded from users Data saved in remote servers Backed up to other remote servers Updated files are saved Managed Max three from: Allows users / programmers to download data from the cloud Administrators control the data stored Data is synched so the most up to date file is presented Changes are tracked	4

Question	Answer	Marks
8	Benefits Max four from: Produces fast / accurate results They can calculate faster than a human They can calculate more accurately than a human Can easily produce a number of different scenarios Cheaper to use a computer than employ lots of staff to model Easily changed to give more accurate / more up to date forecasts Drawbacks Max four from: Results can be unreliable The cost of the hardware needed to set up of system would be very high Many different models can be produced Humans become technology reliant Cannot include all the variables	5

Question	Answer	Marks
9(a)	Three from: Data entry is faster Data entry can be more accurate Less storage space required Faster to search for data Quicker identification of countries Easier to validate	3
9(b)	Four from, for example: Compare test results from the new system with the old Comparison of the final solution with the original user requirements Identifies improvements to the system Evaluate the user's responses to using the system Measure the time taken to complete the task and compare with the old system The appropriateness of the solution The efficiency of the solution	4

Question	Answer	Marks
11(c)(ii)	Two from: Extra margin Adds space to the margins It helps ensure that text isn't obscured by the binding Gives extra space for binding	2

Question	Answer	Marks
12	Four from: Relational database uses two or more tables Relational databases have relationships Relational database use primary keys <u>and</u> foreign keys Allows complex searches / complex reports Uses referential integrity Flat files <u>only</u> use primary keys Flat file is a simple database Flat files have data redundancy Flat files have more duplication of data leading to data entry errors	4

Question	Answer	Marks
13(a)	Three from: A function is part of a formula A function uses a reserved name The operation of a function is built into the software Carries out a specific task A formula starts with an = sign A formula is written by a user	3
13(b)(i)	One from, for example: SUM / AVERAGE Mark any valid function if it is correct	1
13(b)(ii)	One from: Correct example =A1+B1, =SUM(A1:B5) Mark any valid formula if it is correct	1
13(c)(i)	One from: The cell reference is relative to the location of the cell When a formula is copied or filled to another cell, the cell references within the formula adjust based on the new location	1
13(c)(ii)	Two from: If the cell is replicated (1st) the cell reference will change (1) The reference may not point to the correct cell	2

Question	Answer	Marks
14	Two from: Behaviour / scripting Content / structure Presentation / style	2
