MARK SCHEME

Maximum Mark: 60

Published

This mark scheme contains the instructions and marking guidance that our examiners used to mark candidate responses for this component.

Before they start marking, examiners complete a standardisation process. They review a range of candidate responses and discuss the mark scheme in detail to agree which answers can and cannot be accepted. Examiners award marks where it is clear that candidate responses have met the requirements of the mark scheme. These requirements may vary between different components or different versions of the same component, depending on the exact requirements of the question and the candidate responses seen during the standardisation process.

Sometimes, our mark schemes may allow marks to be awarded to responses which contain elements that are factually incorrect or for content not covered by the syllabus. We do this in response to the demands of a specific question to support candidates and make sure that our assessments are fair. However, these allowances should not be used as a guide for teaching and learning.

We cannot discuss the mark scheme with schools, and we recommend that schools read the mark scheme together with the assessment material and the Principal Examiner Report for Teachers.

This document consists of **11** printed pages.

General marking principles

All examiners must apply these marking principles when marking candidate responses.

1	Examiners must award marks for each response in line with: • the specific **content** defined in the mark scheme • the specific **skills** defined in the mark scheme or in the level descriptions • the **standard of response** required as exemplified by the standardisation scripts.
2	Examiners must award **whole marks** (not half marks, or other fractions).
3	Examiners must award marks **positively**. This means that: • marks are not deducted for errors or omissions • marks are awarded for correct/valid answers as defined in the mark scheme and also for **other valid answers** which go beyond the scope of the syllabus and mark scheme referring to your team leader as appropriate • the quality of spelling, punctuation and grammar are judged **only** when the mark scheme indicates that these features are **specifically assessed** in the question. However, the meaning of all responses must be unambiguous.
4	Examiners must **consistently** apply the requirements of the mark scheme and any rules for what to do when candidates have not followed instructions correctly.
5	Examiners must use the **full range of marks** defined in the mark scheme, unless limited by the quality of the candidate responses seen.
6	Examiners must award marks according to the mark scheme and **must not** award marks with grade thresholds or grade descriptions in mind.

Mathematics-Specific Marking Principles

1 Unless a particular method has been specified in the question, full marks may be awarded for any correct method. However, if a calculation is required then no marks will be awarded for a scale drawing.

2 Unless specified in the question, non-integer answers may be given as fractions, decimals or in standard form. Ignore superfluous zeros, provided that the degree of accuracy is not affected.

3 Allow alternative conventions for notation if used consistently throughout the paper, e.g. commas being used as decimal points.

4 Unless otherwise indicated, marks once gained cannot subsequently be lost, e.g. wrong working following a correct form of answer is ignored (isw).

5 Where a candidate has misread a number or sign in the question and used that value consistently throughout, provided that number does not alter the difficulty or the method required, award all marks earned and deduct just 1 A or B mark for the misread.

6 Recovery within working is allowed, e.g. a notation error in the working where the following line of working makes the candidate's intent clear.

Annotations guidance for centres

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

Annotations

Annotation	Meaning
	More information required
	Accuracy mark awarded zero
	Accuracy mark awarded one
	Accuracy mark awarded two
	Accuracy mark awarded three
	Independent mark awarded zero
	Independent mark awarded one
	Independent mark awarded two
	Independent mark awarded three
	Benefit of the doubt

© Cambridge University Press & Assessment 2026

Annotation	Meaning
C	Communication mark
✗	Incorrect
FT	Follow through
Highlighter	Highlight a key point in the working
ISW	Ignore subsequent work
M0	Method mark awarded zero
M1	Method mark awarded one
M2	Method mark awarded two
M3	Method mark awarded three
MR	Misread
O	Omission
Off-page comment	Allows comments to be entered at the bottom of the RM marking window and then displayed when the associated question item is navigated to.
On-page comment	Allows comments to be entered in speech bubbles on the candidate response.
Pre	Premature rounding/approximation
SC	Special case
SEEN	Indicates that work/page has been seen

© Cambridge University Press & Assessment 2026

Annotation	Meaning
TE	Transcription error
✓	Correct
XP	Correct answer from incorrect working

MARK SCHEME NOTES

The following notes are intended to aid interpretation of mark schemes in general, but individual mark schemes may include marks awarded for specific reasons outside the scope of these notes.

Types of mark

M Method marks, awarded for a valid method applied to the problem.

A Accuracy mark, awarded for a correct answer or intermediate step correctly obtained. For accuracy marks to be given, the associated Method mark must be earned or implied.

B Mark for a correct result or statement independent of Method marks.

When a part of a question has two or more 'method' steps, the M marks are in principle independent unless the scheme specifically says otherwise; and similarly where there are several B marks allocated. The notation 'dep' is used to indicate that a particular M or B mark is dependent on an earlier mark in the scheme.

Abbreviations

awrt	answers which round to
cao	correct answer only
dep	dependent
FT	follow through after error
isw	ignore subsequent working
nfww	not from wrong working
oe	or equivalent
rot	rounded or truncated
SC	Special Case
soi	seen or implied

Question	Answer	Marks	Partial Marks	Guidance
For **all** questions: Mark answer line for full marks unless nfww stated, if answer space blank, check diagrams and / or working, condone poor spelling if intention clear				
1(a)	4.8[0] 3.6[0] 1.5[0] 12.9[0]	**4**	**B1** for each **B1 FT** *their* 4.8[0] + *their* 3.6[0]	
1(b)	7.1[0]	**1**	**FT** 20 – *their* 12.9[0], provided *their* 12.9[0] < 20	
2(a)	9	**1**		
2(b)	7	**2**	**B1** for 63 or **M1** for $\frac{9+4+6+8+9+8+9+7+3}{9}$ oe	
2(c)	8	**2**	**M1** for 3, 4, 6, 7, 8, 8, 9, 9, 9 or for correctly ordered list of first 5 or last 5 numbers	Accept reverse order
3(a)	72	**1**		
3(b)	18 50 cao	**1**		Accept 1850, 18:50, 18.50 Condone 1850 h[ours] Do **not** accept 18 50pm or 18 h 50
3(c)	2.15[p.m.] or 14.15	**2**	**B1** for 2.25[p.m.] or 14.25 or for 1.75 soi or for 2.15[p.m.] or 14.15 seen then spoilt	Accept alternate notation for times e.g. 2 15[p.m.], 2:15
4(a)	0.2	**1**		Accept e.g. $\frac{2}{10}$, $\frac{1}{5}$ or 20% isw conversion to fraction or percentage once correct answer seen
4(b)	160	**1**		

© Cambridge University Press & Assessment 2026

Question	Answer	Marks	Partial Marks	Guidance
5(a)		1		Ignore any work for **5(b)** on the diagram Ignore diagrams for further patterns
5(b)	10, 13, 25	2	**B1** for 10 and 13 in the correct positions or 25 in the correct position If **0** scored, **SC1** for 2 of 3 terms correct, **FT** 1 error	*their* 10, *their* 10 + 3, *their* 10 + 15 or 10, *their* 13, *their* 13 + 12
5(c)	$3n + 1$ oe final answer	2	**B1** for $3n + k$ or $jn + 1$ $j \neq 0$ as final answer	Condone change of variable e.g. *N, x* for *n* For **2** marks, accept e.g. $4 + (n - 1)3$, $n(3) + 1$, $nth = n \times 3 + 1$ as final answer Do **not** accept $n = 3n + 1$
6(a)(i)	$P = 6x$	2	**B1** for $6x$ or $x = \frac{P}{6}$ or $P = kx$, $k > 4$	For **2**, *P* must be the subject of the formula Allow equivalents for $6x$, e.g. $P = x + x + x + x + x + x$ *k* must be an integer
6(a)(ii)	12	2	**FT** 72 ÷ (*their* 6) evaluated for 2 marks **M1 FT** for 72 = (*their* 6) × *x* or better	*their* 6 must be an integer **M1** for substituting 72 into *their* $P = kx$ or 72 ÷ (*their* 6)
6(b)	120	2	**FT** *their* 6 from **(a)(i)**. **M1** for $[180 -]\ \frac{360}{(their\,6)}$ oe or $\frac{((their\,6)-2)\times 180}{[(their\,6)]}$ oe	*their* 6 must be an integer **M1** for $\frac{(2\times(their\,6)-4)\times 90}{(their\,6)}$
7(a)	65	2	**B1** for 0.65 or **M1** for $\frac{13}{20} \times 100$ or 13×5 or 20×5	
7(b)	399	2	**B1** for [discount =] 21 or **M1** for 0.05×420 oe or better or for 10% [=] 42 and 5% [=] 42÷2	Condone 420 + 21 for **B1** **M1** implied by answer 441

© Cambridge University Press & Assessment 2026

GradeMax

Question	Answer	Marks	Partial Marks	Guidance
8(a)	$\frac{9}{2}$ or $4\frac{1}{2}$ or 4.5 final answer	**2**	**M1** for $2x = 6 + 3$ or $x - \frac{3}{2} = \frac{6}{2}$ or better	
8(b)	$[x =]$ 3 $[y =]$ 2 nfww	**3**	**M1** for correctly eliminating one variable **A1** for $x = 3$ **A1** for $y = 2$ If **M1 A0 A0** scored, also award **SC1** for two values that satisfy one of the original equations	**M1** implied by $6kx = 18k$ or $9ky = 18k$ Allow 1 arithmetic error for **M1**, but do not allow a sign error
9	1.25 or $1\frac{1}{4}$ or $\frac{5}{4}$	**3**	**M2** for $[x =] \frac{5\times5\times3}{10\times6}$ oe or better or **M1** for $5 \times 5 \times 3$ oe or $10 \times 6 \times x$ oe or better	For 3 marks, allow answer $\frac{75}{60}$ oe fraction (must be $\frac{integer}{integer}$), isw incorrect cancelling or change of form
10	6	**1**		Do **not** accept 2^6
11(a)	$[\cup =]$ 4, 5, 7, 8, 9, 12, 13 $[A \cap B =]$ 7, 12 $[n(A') =]$ 3 cao	**3**	**B1** for each	Elements may be listed in any order Accept 'number = 3' Do **not** accept 'n(3)' or {3}
11(b)	$P \cup Q$ $R \cap T'$	**2**	**B1** for each	
12(a)	Correct translation of A, vertices at (–4, 2) (–1, 0) (–1, 3)	**2**	**B1** for translation by $\begin{pmatrix}-5\\k\end{pmatrix}$ or $\begin{pmatrix}k\\-1\end{pmatrix}$ If 0 scored, **SC1** for correct translation of triangle B	Condone good freehand. Ignore additional triangles from work done in stages.
12(b)	Correct reflection of B, vertices at (–1, –4) (–4, –4) (–3, –1)	**1**

GradeMax

Question	Answer	Marks	Partial Marks	Guidance
12(c)	Rotation 90° clockwise oe [Centre] (0, 0) oe	**3**	**B1** for each	More than one transformation scores **0**. Extra properties count as choice. Accept –90 or 270 anticlockwise or [+]270 Accept origin, O, 'position vector = $\begin{pmatrix}0\\0\end{pmatrix}$' Do **not** accept $\begin{pmatrix}0\\0\end{pmatrix}$ alone If the centre has been described as a vector (word or bracket notation) then do not treat as additional transformation
13	18	**3**	**B1** for $PBQ = 90$ soi **B1** for $BPQ = 18$ or for $x =$ *their* BPQ, provided *their* BPQ < 90 or **M1** 180 – 90 – 72 oe	If answer line blank, check diagram May be on diagram May be on diagram Accept BPQ on the diagram shown as x
14(a)	3.5×10^{-5}	**1**		Ignore superfluous zeros
14(b)	5.4×10^{4}	**2**	**B1** for 54 000 oe or for *their* answer to 60 × 900 correctly written in standard form	Ignore superfluous zeros For **B1** allow allow e.g. 54×10^{3} Must see *their* answer to 60 × 900 written down and then converted to standard form
15(a)	(1, –1)	**1**		
15(b)	$-2x + 1$ final answer	**2**	**B1** for answer of $kx + 1$, $k \neq 0$ or $-2x + p$, any p	Accept $1 - 2x$ for **2** marks k and p must be numbers **B1** for e.g. $-\frac{4}{2}x + 1$, $1 + -2x$
