CAMBRIDGE INTERNATIONAL MATHEMATICS **0607/61**

Paper 6 Investigation and Modelling (Extended) **May/June 2026**

1 hour 30 minutes

You must answer on the question paper.

No additional materials are needed.

INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen. Do **not** use correction fluid or tape.
- Do **not** write on any bar codes.
- You should use a graphic display calculator where appropriate.
- You may use tracing paper.
- You must show all necessary working clearly, including sketches, to gain full marks for correct methods.
- In this paper you will be awarded marks for providing full reasons, examples and steps in your working to communicate your mathematics clearly and precisely.

INFORMATION

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [ ].

This document has **20** pages. Any blank pages are indicated.

Section A

Investigation Frame sums

You are advised to spend no longer than 45 minutes on this section.

In this investigation you will look at calculations in a frame moving on a number grid.

The frame is made of 3 squares.
The frame moves on a number grid.

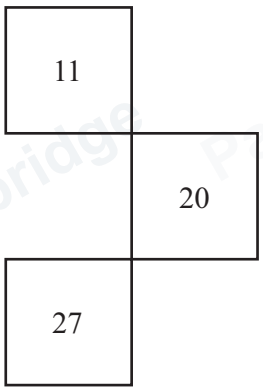

Consecutive whole numbers fill a grid of width 8.
The grid continues downwards.

1	2	3	4	5	6	7	8
9	10	11	12	13	14	15	16
17	18	19	20	21	22	23	24
25	26	27	28	29	30	31	32
33	34	35	36	37	38	39	40

To find the frame sum for any frame:

- square the number on the right
- multiply the two numbers on the left
- subtract the second answer from the first answer.

Example

$20^2 = 400$

$11 \times 27 = 297$

$400 - 297 = 103$

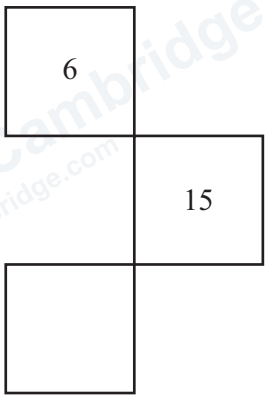

frame sum $= 103$

2 The diagram shows the frame on the same grid.
The number in the top square is n.

(a) Complete the other two squares with expressions in terms of n. [2]

(b) Use algebra to show that an expression for the frame sum is $2n + 81$.

[3]

(c) The frame sum is 197.

Find the number in the top square of the frame.

3 The numbers in the grid now increase by a different amount.

In this grid:

- the numbers start at 11
- the numbers increase by 4
- the width of the grid is 7 squares
- the grid continues downwards.

11	15	19	23	27	31	35
39	43	47	51	55	59	63
67	71	75	79	83	87	91
95	99	103	107	111	115	119

(a) Find the frame sum for this frame.

4 In another grid:

- the numbers increase by d
- the width of the grid is w squares
- the grid continues downwards.

(a) The number in the top square is n.

Complete the bottom square with an expression in terms of n, d and w. [1]

(b) The formula for the frame sum on this grid is

$$\text{frame sum} = 2dn + d^2(w+1)^2.$$

The frame sum for this frame is 1280.
All the numbers in the grid are positive integers.

(i) Show that $w = \dfrac{\sqrt{1280 - 176d}}{d} - 1$.

Section B

Modelling Cones and cylinders

You are advised to spend no longer than 45 minutes on this section.

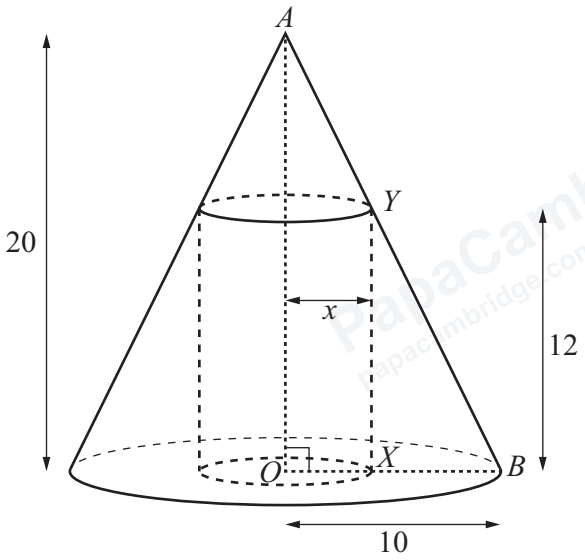

In this task you will look at cylinders that fit inside cones.
All lengths are in centimetres.

You may find these formulas useful.	
Volume, V, of cylinder of radius r, height h	$V = \pi r^2 h$
Volume, V, of cone of radius r, height h	$V = \frac{1}{3}\pi r^2 h$

5 The diagram shows a cylinder that fits inside a cone.
OA is the axis of symmetry.

The cone has height 20 and radius 10.
The cylinder has height 12 and radius x.

NOT TO SCALE

(a) The diagram shows triangles *YXB* and *AOB*.

NOT TO SCALE

Triangle *YXB* is similar to triangle *AOB*.
$XB = 10 - x$

(i) Write the name of the correct line segment in the box.

$$\frac{XB}{OB} = \frac{\square}{OA}$$

[1]

(ii) Write the correct number in the box.

$$\frac{10-x}{10} = \frac{12}{\square}$$

[1]

(iii) Find the value of x.

..... [2]

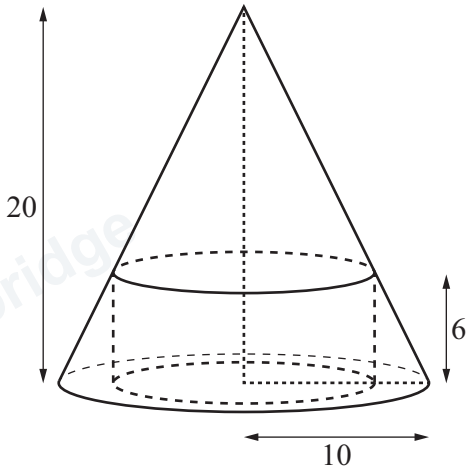

(iv) Use your answer to **5(a)(iii)** to find the volume of the cylinder in terms of π .

..... [2]
