General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

2(c)	Award marks as indicated up to a maximum of 2 marks. Consistency (1) Prudence (1) Accruals/matching (1) Materiality (1) Money measurement (1) Business entity (1) Accept any other appropriate responses.	(2)

Question number	Answer	Mark
2(d)	Award up to 4 marks for discussion on both ratios and the final 1 mark for a conclusion related to the scenario. Sample answer. The current ratio has increased in 2022 , meaning it will be able to pay short-term debts as they become due (1). However, the business is not making efficient use of its current assets (1). The liquid (acid test) ratio has worsened in 2022, meaning the business will have difficulty paying short-term debts without selling inventory (1). This could result in suppliers refusing to make further supplies to the business (1). Therefore the business's short-term liquidity has worsened (1). Accept any other appropriate responses.	(5)
