| Calculators may be used. | Total Marks |

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Without sufficient working, correct answers may be awarded no marks.
- Answer the questions in the spaces provided
– *there may be more space than you need.*

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

PEARSON

Answer all TEN questions.

Write your answers in the spaces provided.

You must write down all stages in your working.

1

Diagram **NOT** accurately drawn

Figure 1

In triangle ABC , $AB = 10$ cm, $AC = 16$ cm and $\angle BAC = 35^\circ$, as shown in Figure 1.

- (a) Find, to 3 significant figures, the area of the triangle ABC . (2)

- (b) Find, in degrees to the nearest 0.1° , the size of the angle ABC . (5)

Question 4 continued

A series of horizontal dotted lines for writing the answer to Question 4.

(Total for Question 4 is 8 marks)

Question 5 continued

A series of horizontal dotted lines for writing the answer to Question 5.

(Total for Question 7 is 10 marks)

Question 8 continued

A large rectangular area containing 25 horizontal dotted lines for writing answers.

Question 9 continued

A large rectangular area containing 25 horizontal dotted lines for writing answers.

Question 9 continued

A large rectangular area with rounded corners, containing 25 horizontal dotted lines for writing.

10

$$\tan \theta = \frac{\sin \theta}{\cos \theta}$$

$$\cos(A + B) = \cos A \cos B - \sin A \sin B$$

A particle P is moving along a straight line. At time t seconds ($t \geq 0$) the displacement,

s metres, of P from a fixed point O on the line is given by $s = \sqrt{3} \sin \frac{1}{2}t + \cos \frac{1}{2}t$

(a) Find the exact value of s when $t = \frac{\pi}{3}$ (2)

(b) Find the exact value of t when P first passes through O . (4)

The velocity of P at time t seconds is v m/s.

(c) Find an expression for v in terms of t . (2)

(d) Show that $v = \cos\left(\frac{\pi}{6} + \frac{1}{2}t\right)$ (2)

(e) Find the exact value of t for which $v = \frac{1}{2}$ when

(i) $0 \leq t < 2\pi$

(ii) $2\pi \leq t < 4\pi$ (4)
