### Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- In Section A, answer **two** questions from Questions 1, 2 **and** 3.
- In Section B, answer **one** question from Questions 4, 5 **and** 6.
- In Section C, answer **one** question from Questions 7, 8 **and** 9.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*
- Calculators may be used.
- Where asked you must **show all your working out** with **your answer clearly identified** at the **end of your solution**.

### Information

- The total mark for this paper is 105.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

### Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

SECTION A

Answer TWO questions from this section.

Some questions must be answered with a cross in a box ☒. If you change your mind about an answer, put a line through the box ☒ and then mark your new answer with a cross ☒.

If you answer Question 1 put a cross in the box ☐ .

1 Economic activity and energy.

(a) Identify what is meant by an **economic sector**.

(1)

|                          |                                                          |
|--------------------------|----------------------------------------------------------|
| <input type="checkbox"/> | <b>A</b> the chain of production in manufacturing        |
| <input type="checkbox"/> | <b>B</b> an economic shift in employment                 |
| <input type="checkbox"/> | <b>C</b> a classification system for types of employment |
| <input type="checkbox"/> | <b>D</b> a classification of employment structures       |

(b) Identify the economic sector that includes agriculture as an activity.

(1)

|                          |                     |
|--------------------------|---------------------|
| <input type="checkbox"/> | <b>A</b> quaternary |
| <input type="checkbox"/> | <b>B</b> tertiary   |
| <input type="checkbox"/> | <b>C</b> secondary  |
| <input type="checkbox"/> | <b>D</b> primary    |

(c) Define the term **raw material**.

"I'm really happy that this  
tourist development is  
planned as I hope to be  
able to get work at the  
new resort."

**Figure 5c**

**Presentation of attitudes towards the tourist development**

| Question number | People's views    |                     |          |                  | Total |
|-----------------|-------------------|---------------------|----------|------------------|-------|
|                 | Strongly disagree | Slight disagreement | Not sure | Slight agreement |       |
| 1               |                   |                     |          | 3                | 3     |
| 2               |                   |                     |          | 7                | 7     |
| 3               | 2                 | 5                   | 3        |                  | 20    |
| 4               | 6                 | 1                   | 3        |                  | 10    |
| 5               | 2                 | 2                   | 2        | 2                | 8     |
| 6               |                   | 5                   | 5        |                  | 10    |
| 7               | 1                 | 6                   | 3        |                  | 10    |
| 8               |                   |                     | 1        | 2                | 9     |

| Human activities                                                                    |                                      | Drivers (causes) of climate change                                                                                                                                           |
|-------------------------------------------------------------------------------------|--------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | <b>Air travel</b>                    | Fossil fuel combustion from increasing global air travel produces CO <sub>2</sub> and nitrous dioxide.                                                                       |
|    | <b>Livestock farming</b>             | Cows and sheep produce large amounts of methane when they digest their food.                                                                                                 |
|    | <b>Industry</b>                      | Energy is used in both the making and distribution of manufactured goods. These have a high global carbon footprint.                                                         |
|   | <b>Electrical energy consumption</b> | Global electricity consumption has risen from increasing wealth and changes in people's lifestyles. A high proportion of electricity is produced from non-renewable sources. |
|  | <b>Deforestation</b>                 | Forests help balance gases in the atmosphere. Deforestation upsets this process, releasing more CO <sub>2</sub> into the atmosphere.                                         |

| Activities                                                                          |                                                 | Drivers (causes) of globalisation                                                                                               |
|-------------------------------------------------------------------------------------|-------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
|    | <b>Transport technology</b>                     | Range and frequency of aircraft routes mean that it is now much cheaper and easier to travel.                                   |
|    | <b>Communication and information technology</b> | Improvements in technology mean that people and companies can be better connected to their customers.                           |
|    | <b>Global businesses (TNCs)</b>                 | Companies have complex logistical operations and supply chains, which now operate at a global scale due to better connectivity. |
|  | <b>Global institutions</b>                      | A range of institutions promote and manage world trade, improve governance and attempt to raise living standards.               |
|  | <b>Flexible labour force</b>                    | People adapt to work in different businesses and in different locations.                                                        |

**Figure 9b**  
**Regional trends in HDI for selected countries, 1980-2016**

| Cause                                                                               |                                | Drivers (causes) of global inequality                                                                                                                                                               |
|-------------------------------------------------------------------------------------|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | <b>Climate change</b>          | Low income countries will experience the biggest effects of human-induced climate change over the next century: sea level rises, stronger cyclones, more unpredictable rains, and longer heatwaves. |
|    | <b>Food and water security</b> | Hurricanes and drought combined with poor soils may mean that some places have low food security. In extreme instances, this weakens and sometimes kills people.                                    |
|    | <b>Resource availability</b>   | Countries vary in the amount of natural resources they have to both use and export. Countries with few natural resources find it hard to create products that can be sold on world markets.         |
|  | <b>Governments</b>             | Good governance can promote and help manage inter country trade and aid, for example to help raise living standards and improve quality of life.                                                    |
|  | <b>Demography</b>              | There are several factors involved, including fertility, mortality and immigration. These will have impacts on population age structures, for example.                                              |
