General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted. Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response

Question Number	Indicative content
4h	<p>Candidates should compare different points of view, giving evidence for each one. The response should include a conclusion. The indicative content is not exhaustive / prescriptive and students should be credited for other relevant content.</p> <ul style="list-style-type: none"> • Awareness of cookies and (in)ability to opt in / out • Search results show content related to previously visited sites creating confirmation bias of opinions • Reduced exposure to alternative views / ability to display alternative views • Tailored content, so content is relevant / irrelevant (based on accuracy of user profiles) • Shared devices mean content may not be appropriate to all users

Level	Mark	Descriptor (AO3 – Discuss)
	0	No rewardable material.
1	1-3	<p>A limited number of points will be identified, which may only support one point of view. At least one point will have evidence to support it. The discussion will have few (if any) links to the scenario. There may be a conclusion but this is likely to be a simple statement. The response will lack clarity and organisation.</p>
2	4-5	<p>A range of points will be identified, which compare different points of view, though the discussion may be unbalanced. Some points will be supported by evidence. The comparisons will include links to the scenario but may include some generic points. A conclusion will be included, which will link with the comparison, though the link may be implicit. The response will show some focus but may not be well organised.</p>
3	6-8	<p>The discussion compares a range of different points of view. Most points will be supported by evidence. The majority of the discussion will link to the scenario. A conclusion will be given that clearly links to the comparisons made in the discussion. The response will show good focus and organisation.</p>
