Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

- **Types of mark**

- M marks: method marks
- A marks: accuracy marks
- B marks: unconditional accuracy marks (independent of M marks)

- **Abbreviations**

- cao – correct answer only
- ft – follow through
- isw – ignore subsequent working
- SC – special case
- oe – or equivalent (and appropriate)
- dep – dependent
- indep – independent
- awrt – answer which rounds to
- eeoo – each error or omission

- **No working**

If no working is shown then correct answers normally score full marks

If no working is shown then incorrect (even though nearly correct) answers score no marks.

- **With working**

If there is a wrong answer indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

If it is clear from the working that the “correct” answer has been obtained from incorrect working, award 0 marks.

If a candidate misreads a number from the question. Eg. Uses 252 instead of 255; method marks may be awarded provided the question has not been simplified. Examiners should send any instance of a suspected misread to review. If there is a choice of methods shown, mark the method that leads to the answer on the answer line; where no answer is given on the answer line, award the lowest mark from the methods shown.

If there is no answer on the answer line, then check the working for an obvious answer.

- **Ignoring subsequent work**

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question: eg. Incorrect cancelling of a fraction that would otherwise be correct.

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect eg algebra.

Transcription errors occur when candidates present a correct answer in working and write it incorrectly on the answer line; mark the correct answer.

- **Parts of questions**

Unless allowed by the mark scheme, the marks allocated to one part of the question CANNOT be awarded to another.

Values in quotation marks must come from a correct method previously seen unless clearly stated otherwise.				
Q	Working	Answer	Mark	Notes
1 (a)		6705	1	B1 cao
(b)		427, 498, 512, 531, 567	1	B1 cao, all numbers must be present
(c)		7 hundredths	1	B1 for 7 hundredths clearly indicated and nothing else indicated – might be circled, underlined etc
(d)		24	1	B1 cao
(e)		31 and/or 37	1	B1 for 31 and/or 37 and no other number stated
				Total 5 marks

2 (a)		40	1	B1 cao
(b)		42	1	B1 cao
(c)		2 whole symbols and a half of a whole symbol indicated on diagram	1	B1 oe
				Total 3 marks

3 (a)		638	1	B1
(b)		6750 marked	1	B1 for any clear indication of the notch before 7000 allow an arrow from above or below or any other clear indication
(c)		8.7	1	B1 8.5 – 8.9
(d)		correct angle drawn	1	B1 for an angle of 66 – 70 degrees drawn
				Total 4 marks

16	$40 \times 40 (= 1600)$ or $12 \times 3 \times 40 \times 40 (= 57600)$ or $80 \times 200 (= 16000)$ or $120 \times 160 (= 19200)$ or $120 \times 240 (= 28800)$ or $80 \times 80 (= 6400)$ or $160 \times 80 (= 12800)$ or $200 \times 240 (= 48000)$		4	M1 for a method to find the area of a tile or the area of all the tiles Jim has or an area linked to the wall
	$"19200" + "16000" (= 35200)$ or $"28800" + "6400" (= 35200)$ or $"48000" - "12800" (= 35200)$ oe OR $"16000" \div "1600" (= 10)$ or $"19200" \div "1600" (= 12)$ or $"28800" \div "1600" (= 18)$ or $"6400" \div "1600" (= 4)$ or $"12800" \div "1600" (= 8)$ or $"48000" \div "1600" (= 30)$			M1 for a fully correct method to find the area of the wall OR for a method to find the number of tiles needed to cover an area linked to the wall
	$"35200" \div (40 \times 40) (= 22)$ oe or $"35200" \div "1600" (= 22)$ or $(57600 - 35200) \div "1600"$ or $"22400" \div "1600"$ OR $"10" + "12" (= 22)$ or $"18" + "4" (= 22)$ or $"30" - "8" (= 22)$			M1 for a correct method to find the number of tiles needed or for a correct method to find the number of tiles that are left over Do not allow this mark for 22 if clearly coming from wrong working (eg work with perimeter)
	Correct answer scores full marks (unless from obvious incorrect working)	14		A1 Accept 1 whole box + 2 tiles
	ALTERNATIVE			
	$240 \div 40 (= 6)$ or $200 \div 40 (= 5)$ or $120 \div 40 (= 3)$ or $160 \div 40 (= 4)$ or $80 \div 40 (= 2)$		4	M1 for a method to find the number of tiles along one edge, may be seen drawn along the edges on the diagram Do not allow for sight of these calculations embedded as part of an attempt at perimeter $\div 40$

	$3 \times 4 (= 12)$ or $5 \times 2 (= 10)$ or $2 \times 2 (= 4)$ or $3 \times 6 (= 18)$ or $6 \times 5 (= 30)$ or $4 \times 2 (= 8)$			M1 for a method to find the number of tiles needed to cover at least one area of the wall
	$"12" + "10" (= 22)$ or $"18" + "4" (= 22)$ or $"30" - "8" (= 22)$			M1 for a fully correct method to find the total number of tiles needed to cover the wall Do not allow this mark for 22 if clearly coming from wrong working (eg work with perimeter)
	<i>Correct answer scores full marks (unless from obvious incorrect working)</i>	14		A1 Accept 1 whole box + 2 tiles

	Correct answer scores full marks (unless from obvious incorrect working)	$y > 9.5$		A1 oe eg $\frac{19}{2} < y$ Must have correct inequality symbol on answer line NB sight of correct answer in working space but just (y =) 9.5 on answer line gains M1 only
(c)		$5w^2x^2(3x^3 + 5w)$	2	B2 for the correct factorisation (B1 for a correct partial factorisation of at least 2 different terms outside the bracket eg $5wx(3wx^4 + 5w^2x)$ or $5w^2(3x^5 + 5wx^2)$ or for the correct highest common factor on the outside and one term inside the bracket correct eg $5w^2x^2(3x^3 + \dots)$ or $5w^2x^2(\dots + 5w)$ or for $(3x^3 + 5w)$ as a factor

(d)		$3a^3c^4$	2	B2 oe eg $\frac{3a^3}{c^{-4}}$ (B1 for a single product with any two of 3, a3, c4 correct, eg 3a3cn where n ≠ 4 or 3amc4 where m ≠ 3 or pa3c4 where p ≠ 3. One term can be missing with 2 correct for B1)
