Paper 2

Monday 16 January 2012 – Morning

Time: 2 hours 30 minutes

Paper Reference

4MB0/02

You must have: Ruler graduated in centimetres and millimetres, protractor, compasses, pen, HB pencil, eraser, calculator. Tracing paper may be used.

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- **Calculators may be used.**

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.
- Without sufficient working, correct answers may be awarded no marks.

PEARSON

2 Ahmed bought a car on 1st January 2010 for £15 000

During 2010, the value of the car decreased by 25% of its value on 1st January 2010

During 2011, the value of the car decreased by 20% of its value on 1st January 2011

(a) Calculate the value of the car on 1st January 2012

(3)

(b) Calculate the total percentage decrease in the value of the car on 1st January 2012
from its value on 1st January 2010

(2)

(Total for Question 2 is 5 marks)

Diagram **NOT** accurately drawn

A circle with points A , B , C , and D on its circumference. A line segment AD is drawn, and an angle of 70° is marked at vertex A between segments AB and AD . A line segment BD is also drawn. A line segment CD is drawn with a single tick mark. A line segment AC is drawn with a double tick mark. A line segment ST is drawn tangent to the circle at point D , with S to the left and T to the right.

In Figure 1, $ABCD$ is a circle. AB is a diameter with $BC = CD$. The straight line SDT is a tangent to the circle $ABCD$ at the point D and $\angle BAD = 70^\circ$.

-
- This image shows a blank sheet of white paper with ten horizontal dashed lines spaced evenly apart, resembling notebook paper. The lines are thin and grey, extending across the full width of the page. There is no handwriting or other markings on the paper.

Question 3 continued

(Total for Question 3 is 4 marks)

- 4 One hundred students sat a test. The times taken by the students to complete the test are summarized in the table.

Time (t)	Number of students
$0 \leq t < 25$	20
$25 \leq t < 35$	11
$35 \leq t < 40$	27
$40 \leq t < 60$	15
$60 \leq t < 90$	15
$90 \leq t < 100$	12

- (a) Use the information given in the table to calculate an estimate for the mean time taken, to one decimal place.

(3)

- (b) Given that the frequency density for the $40 \leq t < 60$ time interval is 0.75, complete the histogram to represent this information on the graph paper.

(4)

Question 4 continued

(Total for Question 4 is 7 marks)

5

Figure 2

Figure 2 shows a diagram of routes to a factory. There are four road junctions labelled A , B , C and D and four towns labelled W , X , Y and Z . Mr Driver is approaching junction A from Town W , as shown, when he realises that he does not know how to get to the factory. He decides that at each road junction he will choose a road to take at random, but he will **not** turn around and go back along the road he has just travelled.

- (a) Write down the probability that Mr Driver will choose the direct road to the factory at road junction A . (1)
- (b) Show that the probability that Mr Driver will pass through exactly two road junctions and reach the factory is $\frac{5}{18}$. (3)

During the journey, if Mr Driver takes the road towards Town X , the road towards Town Y or the road towards Town Z he will not arrive at the factory.

- (c) Find the probability that Mr Driver will not arrive. (3)

Question 5 continued

Question 5 continued

Question 5 continued

(Total for Question 5 is 7 marks)

6 The points $A(1, 3)$, $B(4, 4)$ and $C(6, 2)$ are the vertices of $\triangle ABC$.

(a) On the graph paper, draw and label $\triangle ABC$.

(1)

The matrix $\mathbf{S} = \begin{pmatrix} \frac{3}{2} & 0 \\ 0 & \frac{3}{2} \end{pmatrix}$

$\triangle ABC$ is transformed to $\triangle A_1B_1C_1$, where A_1 , B_1 and C_1 are respectively the images of A , B and C , under the transformation with matrix $\mathbf{S}$.

(b) (i) Find the coordinates of A_1 , B_1 and C_1

(ii) Draw and label $\triangle A_1B_1C_1$

(3)

The matrix $\mathbf{T} = \begin{pmatrix} \frac{1}{2} & 0 \\ 0 & -\frac{1}{2} \end{pmatrix}$

$\triangle A_1B_1C_1$ is transformed into $\triangle A_2B_2C_2$, where A_2 , B_2 and C_2 are respectively the images of A_1 , B_1 and C_1 , under the transformation with matrix $\mathbf{T}$.

(c) (i) Find the coordinates of A_2 , B_2 and C_2

(ii) Draw and label $\triangle A_2B_2C_2$

(3)

(d) Describe fully the transformation of $\triangle ABC$ to $\triangle A_2B_2C_2$

(3)

This image shows a single sheet of white paper with horizontal dotted lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting or typing. There are no margins, text, or other markings on the paper.

(Total for Question 6 is 10 marks)

7 There are 25 boys in a class in a school.

All of the boys in the class play at least one of the sports football (F), cricket (C) and tennis (T). Some details about the number of boys who play these three sports are given in the Venn diagram Figure 3.

Figure 3

9 boys play cricket.

(a) Find the value of x .

(2)

8 boys do not play football or cricket.

(b) Calculate how many boys play football.

(2)

Only 3 boys play both football and tennis but not cricket.

(c) Calculate how many boys play football only.

(2)

(d) (i) Shade the region $F' \cap (T \cup C)$ in the Venn diagram.

(ii) What sports are played by the boys in this set?

(iii) What sport is played by all the boys not in this set?

(4)

This image shows a single sheet of white paper with horizontal dotted lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting or typing. There are no margins, text, or other markings on the paper.

Question 7 continued

Question 7 continued

(Total for Question 7 is 10 marks)

8

**Figure 4**

$ABCD$ is a rectangular piece of paper where $AB = 2\pi r$ cm and $BC = h$ cm.

A right circular hollow cylinder, of radius r cm and height h cm, is made by joining side AD to side BC so that the circumference of the cylinder is $2\pi r$ cm and its height h cm.

Given that the perimeter of $ABCD$ is 60 cm,

(a) show that

$$h = 30 - 2\pi r \quad (2)$$

(b) show that the volume, V cm³, of the hollow cylinder is given by

$$V = 2\pi r^2 (15 - \pi r) \quad (2)$$

(c) show that for the volume of the cylinder to be a maximum

$$r = \frac{10}{\pi} \quad (5)$$

This image shows a full page of white paper with horizontal dotted lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting practice. There are no margins, text, or other markings on the page.

Question 8 continued

(Total for Question 8 is 9 marks)

9

Figure 5

In Figure 5, OAB is a triangle with $\overrightarrow{OB} = \mathbf{b}$.

The point R lies on OA such that $OR : RA = 1 : 3$ and $\overrightarrow{OA} = 4\mathbf{a}$.

Express in terms of $\mathbf{a}$ and $\mathbf{b}$ or $\mathbf{a}$ or $\mathbf{b}$,

- (a) (i) $\overrightarrow{OR}$, (ii) $\overrightarrow{RB}$, (iii) $\overrightarrow{AB}$.

(3)

The point P lies on AB such that $AP : PB = 1 : 2$

Express in terms of $\mathbf{a}$ and $\mathbf{b}$, simplifying your answers where possible,

- (b) (i) $\overrightarrow{PB}$, (ii) $\overrightarrow{OP}$.

(3)

BRM is a straight line such that $\overrightarrow{MB} = k\overrightarrow{RB}$, where k is a constant.

Given that the line MP is parallel to OB ,

- (c) (i) show that $k = \frac{8}{3}$,
 (ii) find an expression for $\overrightarrow{MP}$ in terms of $\mathbf{b}$

(4)

The point of intersection of MP and OA is N such that

$$\overrightarrow{NP} = l\mathbf{b} \text{ and } \overrightarrow{RN} = m\mathbf{a}$$

- (d) Find an expression for $\overrightarrow{OP}$ in terms of $\mathbf{a}$, $\mathbf{b}$, l and m

(1)

- (e) Hence find the value of m

(3)

This image shows a full page of white paper with horizontal dotted lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting practice. There are no margins, text, or other markings on the page.

Question 9 continued

Question 9 continued

(Total for Question 9 is 14 marks)

10

Figure 6

Figure 6 shows a solid $ABCDEF$ in which $ABCD$ is a horizontal rectangle, $ADEF$ and $BCEF$ are trapezia, and ABF and CDE are non-vertical triangles.

In the horizontal rectangle $ABCD$, $AB = CD = 5$ cm and $BC = AD = 10$ cm.

In the trapezia $ADEF$ and $BCEF$, $FE = 8$ cm, $AF = BF = CE = DE = 3$ cm.

Calculate the size, in degrees to 3 significant figures, of

(a) $\angle ABF$ (3)

(b) $\angle FBC$ (3)

Z is the point in the rectangle $ABCD$ such that FZ is vertical.

(c) Calculate the length, in cm to 3 significant figures, of FZ . (4)

(d) Calculate the total surface area, in cm^2 to 3 significant figures, of the solid $ABCDEF$. (6)

$$\left[\text{Area of triangle} = \frac{1}{2}bc \sin A, \text{Area of trapezium} = \frac{1}{2}(a+b)h, \right.$$

$$\left. \text{Cosine rule } a^2 = b^2 + c^2 - 2bc \cos A \right]$$

Question 10 continued

Handwriting practice area with 20 horizontal dotted lines.

Question 10 continued

Question 10 continued

(Total for Question 10 is 16 marks)

11

$$y = \frac{x^2}{5} + \frac{4}{x} - 1$$

- (a) Complete the table of values for $y = \frac{x^2}{5} + \frac{4}{x} - 1$, giving your answers to 2 decimal places where necessary.

x	1	1.5	2	2.5	3	3.5	4
y	3.2		1.8		2.13		3.2

(3)

- (b) On the grid, plot the points from your completed table and join them to form a smooth curve.

(3)

- (c) On the grid, draw the straight line with equation $y = \frac{x}{5} + 2$

(1)

- (d) For values of x in $1 \leq x \leq 4$, use your graphs to find the range of values of x for

which $\frac{x}{5} + 2 \geq \frac{x^2}{5} + \frac{4}{x} - 1$

(2)

- (e) By algebraically rearranging $x^3 - x^2 - 15x + 20 = 0$ and using your graphs, find the solutions of $x^3 - x^2 - 15x + 20 = 0$ in the range $1 \leq x \leq 4$
