

Please check the examination details below before entering your candidate information			
Candidate surname		Other names	
Pearson Edexcel International GCSE		Centre Number 	Candidate Number
Tuesday 7 January 2020			
Morning (Time: 1 hour 30 minutes)		Paper Reference 4MB1/01R	
Mathematics B Paper 1R			
You must have: Ruler graduated in centimetres and millimetres, protractor, compasses, pen, HB pencil, eraser, calculator. Tracing paper may be used.			Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- **Calculators may be used.**

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.
- Without sufficient working, correct answers may be awarded no marks.

1/1/1/1/

Pearson

Answer all TWENTY NINE questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

- 1 Express $7\frac{1}{2}$ minutes as a fraction of 24 hours.
Give your answer in its simplest form.

(Total for Question 1 is 2 marks)

- 2 The n th term of a sequence is given by the expression $2n^2 - 5$
Find the first term of the sequence and the third term of the sequence.

First term =

Third term =

(Total for Question 2 is 2 marks)

- 3 Solve $\frac{1}{x} - \frac{1}{3} = \frac{1}{2}$

$x =$

(Total for Question 3 is 2 marks)

- 4 Factorise completely $2x^2 - 6xy + 5wx - 15wy$

.....

(Total for Question 4 is 2 marks)

- 5 The function g where $g:x \mapsto 16 - x^2$ is defined for all values of x .
Write down

(i) the maximum value of $g(x)$,

.....

(ii) the range of g .

.....

(Total for Question 5 is 2 marks)

- 6 Find the value of $\frac{2 \times 10^{-98}}{16 \times 10^{50}}$

Give your answer in standard form.

.....

(Total for Question 6 is 2 marks)

7 Given that $y = \frac{x^4}{4} - \frac{4}{x^4}$

find $\frac{dy}{dx}$

$$\frac{dy}{dx} = \dots\dots\dots$$

(Total for Question 7 is 2 marks)

8

Write down

(a) the number of lines of symmetry of the figure,

.....
(1)

(b) the order of rotational symmetry of the figure.

.....
(1)

(Total for Question 8 is 2 marks)

- 9 Find the range of values of x for which

$$x - 10 < 3x + 4 \leq 20 - 5x$$

.....

(Total for Question 9 is 3 marks)

- 10 A factory produces 2500 plates. There are large plates and small plates.

There are 800 large plates which have a mean weight of 600 grams.

The small plates have a mean weight of 450 grams.

Calculate the mean weight, in grams, of all 2500 plates.

..... grams

(Total for Question 10 is 3 marks)

11 Find, showing your working clearly,

- (i) the lowest common multiple (LCM) of 42, 54 and 66
- (ii) the highest common factor (HCF) of 42, 54 and 66

(i) LCM =

(ii) HCF =

(Total for Question 11 is 3 marks)

12 During a week, 500 trains will arrive at a station.

Each train will be late, on time or early.

The probability of a train arriving late is 0.85

The probability of a train arriving on time is 0.07

Calculate an estimate for the number of trains that will arrive early during the week.

(Total for Question 12 is 3 marks)

13

Write down the three inequalities that define the shaded region in the diagram.

.....

.....

.....

(Total for Question 13 is 3 marks)

14

$$P = \{ a, b, c, d \}$$

Write down all of the subsets of P that have 2 elements.

.....

(Total for Question 14 is 3 marks)

15 Simplify fully $\frac{x}{6}(7x - 3) - \frac{x}{3}(5x - 9)$

.....

(Total for Question 15 is 3 marks)

16 $ABCD$ is a rectangle with perimeter 28 m.

The length of AB is 8 m.

Calculate the length, in m, of the diagonal AC of the rectangle.

..... m

(Total for Question 16 is 3 marks)

Diagram **NOT**
accurately drawn

The diagram shows the trapezium $ABCD$ in which AD and BC are parallel.

$$AC = 20\text{ cm} \quad BC = 30\text{ cm} \quad \angle ACD = 50^\circ \quad \angle ADC = 90^\circ$$

Calculate the area, in cm^2 to 3 significant figures, of the trapezium $ABCD$.

..... cm^2

(Total for Question 17 is 3 marks)

18 Express $\frac{\sqrt{35} + 3\sqrt{5} - 2\sqrt{7} - 6}{\sqrt{5} - 2}$

in the form $m + \sqrt{n}$, where m and n are integers.
Show your working clearly.

21 The weights of 710 passengers boarding buses at a bus station were recorded.
The incomplete table and histogram give information about these passengers.

Weight of passenger (w kg)	Number of passengers
$50 \leq w < 60$	80
$60 \leq w < 80$	120
$80 \leq w < 95$	270
$95 \leq w < 115$	

- (a) Complete the table. (1)
- (b) Complete the histogram.

(Total for Question 21 is 4 marks)

- 22 In a survey of 55 farmers who keep animals, the numbers of farmers who keep cattle (C), goats (G) and sheep (S) were recorded.

The Venn diagram shows information about the results of the survey.

The numbers shown in the Venn diagram are the **number** of farmers in the given subset of $\mathcal{E}$.

- (a) (i) Find $n(C \cap G \cap S)$

.....

- (ii) Describe the members of the subset $C \cap G \cap S$

.....

(2)

- (b) (i) Find $n(C' \cap G' \cap S)$

.....

- (ii) Describe the members of the subset $C' \cap G' \cap S$

.....

23 A particle is dropped from rest and falls a distance of s metres in time t seconds.

In the first 4 seconds after it has been dropped, the particle falls a distance of 96 metres.

At time 5 seconds after it has been dropped, the particle is at the point A .

At time 6 seconds after it has been dropped, the particle is at the point B .

Given that s is directly proportional to the cube of t ,

calculate, in metres, the distance AB .

..... m

- 27 At time $t = 0$ seconds, a cyclist passed the point P on a straight horizontal road. The cyclist was moving with a constant speed of 5 m/s . The cyclist travelled a distance of 35 m at this speed to the point Q on the road.

On reaching Q , the cyclist decelerated at a constant rate, coming to rest at the point R on the road such that PQR is a straight line and $QR = 10 \text{ m}$.

Represent, on the grid, the information for the journey of the cyclist from P to R as a speed-time graph.

(Total for Question 27 is 5 marks)

28

Diagram **NOT**
accurately drawn

The diagram shows circle $ABCD$ with centre O , diameter $AMONC$ and radius r .

The diagram also shows circle $AFOG$, with centre M , and circle $OH CJ$, with centre N .

- (a) Find and simplify an expression, in terms of r and π , for the perimeter of the shaded region in the diagram.
