Mathematics B
PAPER 1R

You must have: Ruler graduated in centimetres and millimetres, protractor, pair of compasses, pen, HB pencil, eraser, calculator. Tracing paper may be used.

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- **Calculators may be used.**

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.
- Without sufficient working, correct answers may be awarded no marks.

Q:1/1/1/1/

Answer ALL TWENTY SEVEN questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

1 Calculate the value of $\frac{2.89}{12.3 - 9.91}$

Give your answer as a decimal to 5 significant figures.

.....
(Total for Question 1 is 1 mark)

2 The n th term of a sequence is given by $7 - 4n$

Determine whether -123 is a term of this sequence.
Show your working clearly.

(Total for Question 2 is 2 marks)
