

Answer ALL questions. Write your answers in the spaces provided.

Some questions must be answered with a cross in a box ☒. If you change your mind about an answer, put a line through the box ☒ and then mark your new answer with a cross ☒.

1 (a) Which **one** of the following values shows perfectly price elastic demand? (1)

- A -1
- B -0.5
- C Zero
- D Infinity

(b) A country has a minimum wage of €6.04 per hour. If a worker provides 35 hours of labour in a week, the lowest weekly wage the worker can earn is (1)

- A €6.04
- B €205.36
- C €211.40
- D €422.80

(c) What is meant by the term mixed economy? (2)

2 (a) Which **one** of the following diagrams shows excess supply?

(1)

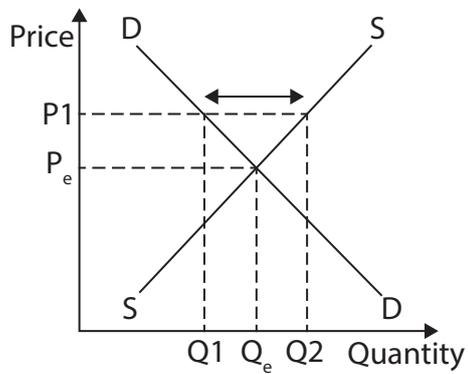

A

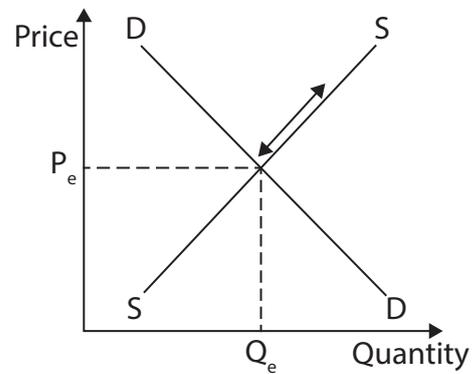

B

C

D

(b) Which **one** of the following is a feature of a monopoly?

(1)

- A** Consumers have a choice of firms
- B** There are many firms competing in the market
- C** The firm is a price-maker
- D** There are low barriers to entry

(c) Calculate the **percentage change in quantity demanded** for a product if the price elasticity of demand (PED) is -1.9 and the price falls by 10%. You are advised to show your working.

3 (a) An increase in which **one** of the following is most likely to cause a decrease in the supply of labour? (1)

- A The retirement age
- B The school-leaving age
- C The population
- D The demand for the final product

(b) Which **one** of the following is the formula to calculate total revenue? (1)

- A Quantity sold \times price
- B Profit $-$ price
- C Profit \div price
- D Quantity sold \div price

(c) Using the diagram below, draw a price elastic demand (PED) curve. Label the curve and show the impact on both axes from a change in price. (3)

More than one million drinks are bottled each day at the Coca-Cola factory in Mwanza, Tanzania. Over 1,000 workers are involved in the process at its 65,000 m² site, which includes filling bottles, sealing them with caps and adding labels. This enables consumers across East Africa to enjoy brands such as Coca-Cola, Fanta and Sprite.

(d) With reference to the data above and your knowledge of economics, analyse the possible advantages for Coca-Cola of using division of labour at the factory.

Many firms in Bangladesh produce textiles. In the factories, cotton shirts, knitwear and suits are produced. These factories are often operating below capacity.

About 40% of the Bangladeshi population is employed in the agricultural sector. Crops such as wheat, corn and fruit are produced annually by this sector.

- (e) With reference to the data above and your knowledge of economics, assess whether supply is likely to be more price elastic for textiles than for agricultural products.
