DO NOT WRITE IN THIS AREA

The diagram shows quadrilateral $ABCD$

- (a) Construct the locus of all points that are 4 cm from C (1)
- (b) Using ruler and compasses only and **showing all your construction lines**, construct the perpendicular bisector of AD (2)

The region **R** consists of all the points inside the quadrilateral that are less than 4 cm from C and nearer to A than to D

- (c) Show, by shading, the region **R**
Label the region **R** (1)

DO NOT WRITE IN THIS AREA

5 A large rental company has cars, vans and minibuses available to rent.

The cost to rent a minibus from the company is found by adding

- \$1000 rental fee
- \$400 for each day the minibus is rented
- \$0.8 per kilometre the minibus travels during the time it is rented

This cost is reduced by $n\%$ if the minibus is a hybrid vehicle.

The total cost of hiring 3 minibuses that are hybrid vehicles for 7 days is \$10 584

Given that each minibus travels a total distance of 500 kilometres during these 7 days

(a) find the value of n
 Show all your working. (5)

The number of cars the company owns is the Highest Common Factor (HCF) of

$$2^2 \times 3^5 \times 5^3 \text{ and } 2^5 \times 3^2 \times 5^5 \times 7$$

(b) Find the number of cars the company owns. (1)

The number of cars that are hybrid vehicles is the least value of N such that

- when N is divided by 120 the remainder is 7 and
- when N is divided by 504 the remainder is 7

(c) Find the number of cars that are hybrid vehicles. (3)

The company owns 200 vans and minibuses in total.

Each van and each minibus is either an electric vehicle or a hybrid vehicle.

The ratio of the number of vans to the number of minibuses is 5 : 3

40% of the vans are hybrid vehicles.

$\frac{9}{25}$ of the minibuses are hybrid vehicles.

(d) Express the total number of vans and minibuses which are hybrid vehicles as a percentage of the total number of vans and minibuses.
 Show your working clearly. (4)

6 A group of 90 students were asked if they own any of a dog (D), a cat (C) or a horse (H)

Of these 90 students

4 own all three

14 own a dog and a cat

7 own a cat and a horse

26 own a dog only

2 own a horse only

6 own none of these animals

Let x be the number of these students who own a cat only.

(a) Show all this information on the Venn diagram, giving the number of students in each appropriate subset, in terms of x where necessary.

(3)

The number of these students who own a cat is 37 more than the number of these students who own a horse.

(b) Find the value of x

(2)

(c) Find $n(D \cap H')$

(1)

(d) Find $n([C \cup D]')$

8 Table 1 gives information about the probability that a biased red six-sided dice will land on each of the numbers 1, 2, 5, 7, 9, 11

Table 1

Number	1	2	5	7	9	11
Probability	0.1	0.15	0.2	$2x$	$2x + 0.1$	x

Calvin rolls the red dice once.

- (a) Calculate the probability that the red dice lands on
 - (i) either the number 2 or the number 5 (1)
 - (ii) an odd number (1)
 - (iii) a number less than 8 (3)

Pabel rolls the red dice twice.

- (b) Calculate the probability that the red dice lands on the numbers 2 and 5 (2)

Tai rolls the red dice 80 times.

- (c) Calculate the expected number of times the red dice lands on a number less than 5 (2)

A biased blue six-sided dice has faces numbered 2, 4, 6, 8, 10, 12

The probability that the blue dice lands on the number 2 is 0.24

The probability that the blue dice lands on the number 4 is 0.12

In a game Tai rolls the red dice once and the blue dice once.

The number that the red dice lands on is added to the number that the blue dice lands on to give his score in the game.

Given that his score is less than 6

- (d) find the probability that the red dice lands on the number 2 (3)

Diagram NOT accurately drawn

Figure 2

Figure 2 shows a solid made by joining a half cylinder to a prism.

The plane face of the half cylinder coincides with the top face of the prism.

The rectangular base $ABGH$ of the solid is horizontal.

The cross section $ABCD$ of the prism is a trapezium such that AB is parallel to DC

$$AB = 26 \text{ cm} \quad DC = 10 \text{ cm} \quad BG = 20 \text{ cm} \quad AD = BC = 17 \text{ cm}$$

The perpendicular height of the trapezium $ABCD$ is 15 cm

- (a) Calculate, in cm^2 to 2 significant figures, the total surface area of the solid.
Show all your working.

(5)

O is the midpoint of EF

N is the point on the edge of the half cylinder vertically above O

- (b) Calculate the size, in degrees to 3 significant figures, of $\angle AON$

11 The curve C has equation $f(x) = 2x^3 - x^2 - 5x - 2$

(a) Use the factor theorem to show that $(x - 2)$ is a factor of $f(x)$ (2)

(b) Hence find the x coordinate of each point where curve C crosses the x -axis.
Show clear algebraic working. (4)

The curve C has two turning points.

The x coordinates of the turning points are such that $6x^2 - 2x - 5 = 0$

(c) Find the coordinates, to 2 decimal places, of these two turning points.
Show your working clearly. (3)

(d) Complete the table of values for $y = f(x)$

x	-1.5	-0.75	0	0.75	1.5	2.25
y		0.3	-2	-5.5		4.5

(1)

(e) (i) On the grid opposite, plot the points where curve C crosses the x -axis,
the two turning points and all the points from your completed table.

(ii) Join all the points to form a smooth curve. (4)

(f) By drawing a suitable line on the grid, find estimates to one decimal place, of the
solutions to the equation $2x^3 - x^2 - 3x + 1 = 0$ in the interval $-1.5 \leq x \leq 2.25$ (3)

(g) By drawing a suitable line (at least 3 cm long) on the grid, find the gradient of
curve C at the point where $x = 1.5$ (2)
